

CAR OF THE MONTH

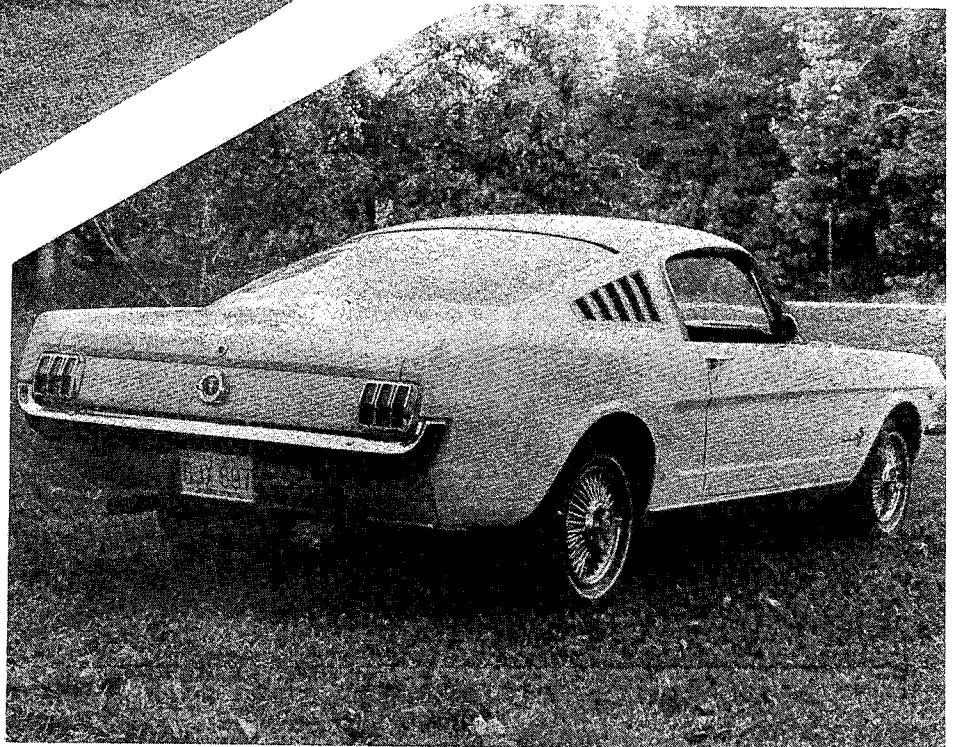

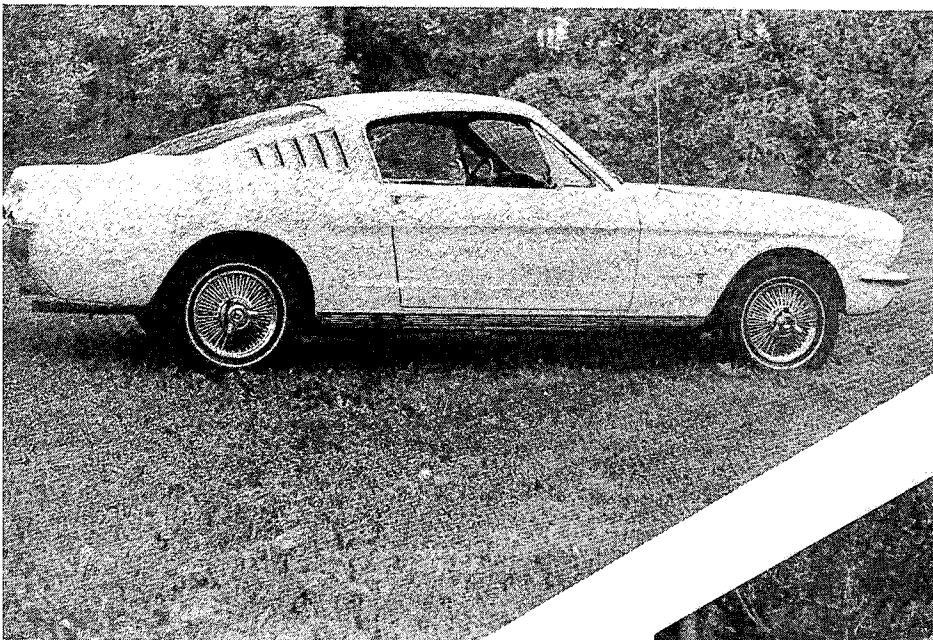

1965 MUSTANG 2+2 FASTBACK

OWNED BY: GARY GODDARD

I bought my Mustang in 1973 from its original owner. My 1965 Mustang has never been wrecked or repainted. It is powered by its original 289 4-V engine with 4-speed transmission. The only options on the car originally were a bench seat and Rally-Pac. The only deviations from original have been the installation of a Hurst four speed shifter and a new dual exhaust system.

The car had been driven daily until I purchased it two years ago. It had in excess of 200,000 miles. In the last two years, I have averaged only 25 or so miles per year.

I am planning to fully restore the car in the near future, but it must wait until I am finished restoring a 1966 2+2 G.T. Fastback with which I am presently involved.

Henry Ford, I do declare
You have your Grandpa Henry's flair.
He put a Ford in every home.
You put a Mustang there.
Congratulations.
The wait out here is somewhat sickly
Could you fix me up more quickly?
