

## NEW PRODUCT ANNOUNCEMENT

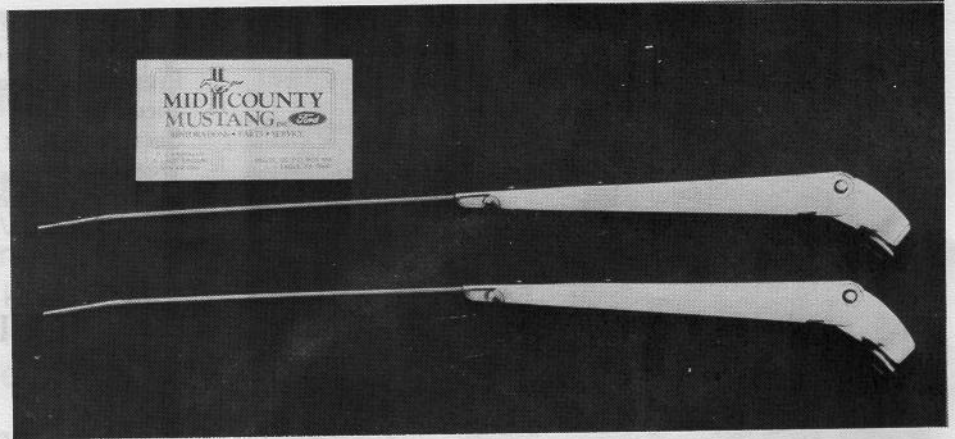

Mid-County Mustang is proud to announce the marketing of an up to now, Unavailable Mustang Part.

Our company is offering reconditioned/rechromed wiper arms, application 64-65 and 66 Ford Mustangs.

Each arm is hand disassembled. The knuckle is sent out for replating, the stainless steel shank is machine polished, and the internal moving parts are replaced/reconditioned as required.

The knuckle and shank are then rejoined by a new rivet. The end result is an original "show quality" like new, Mustang wiper arm. (Less blades).

Mid-County Mustang located a supplier capable of manufacturing the rivets, sub-contracted a chrome plater, and designed a fixture to reassemble the arm to O.E.M. specifications.

Mid County Mustang is the exclusive supplier, and has stockpiled hundreds of wiper arm cores, anticipating a strong demand for this necessary and much sought after Mustang part.
