

Larry's Recommends New Reproductions for the Best Dressed Mustangs

Fullerton, CA — If you've been having difficulty finding high quality front fender ornaments for your 1965-1968 Mustang, search no more. Larry's has just the part to dress-up your classic!

Larry's is now offering two new reproductions of running horse fender ornaments. One for your 1965-68 classic Mustang and another running horse for your "289" classic Mustang (1967-1968).

These newly reproduced ornaments are of better quality than the originals. With high quality chrome, thicker, brighter, long lasting painted colors, and intricate detailing. These ornaments will have your Mustang looking ready for a night on the town.

Now Larry's has these beautiful pieces priced below Ford's list at only \$9.95 for the clean 1965-68 model and a mere \$13.95 for the special

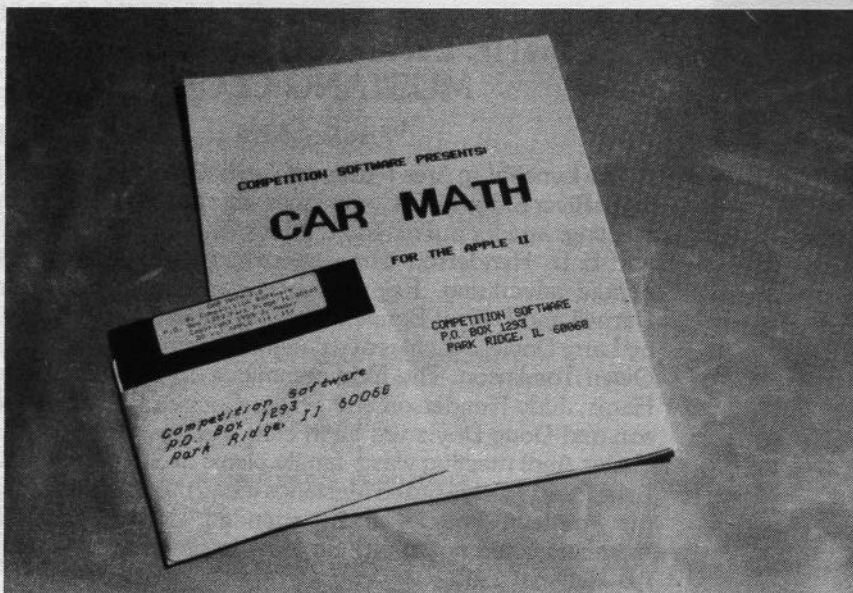

"289" model. We also offer a price break to distributors.

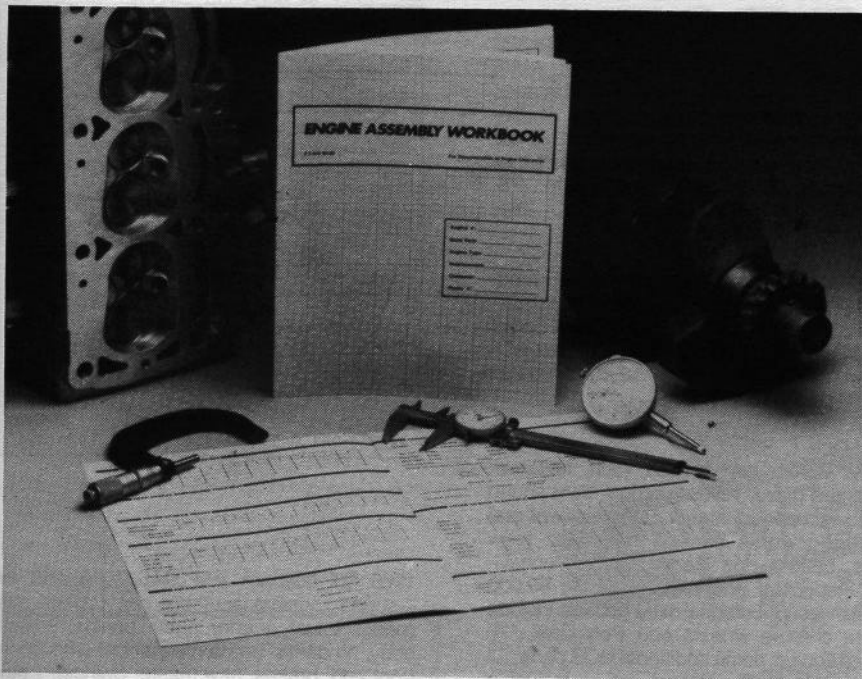

Call and find out why Larry's is the only classic Mustang source you'll ever need — we have the parts, prices and experts to prove it!

In California call toll free (800) 858-6125 or (714) 871-6432. In the continental U.S. call toll free (800) 854-0393. Write for our free Mustang parts catalog — 511 S. Raymond Avenue, Fullerton, CA 92631.

Computers to help work on cars . . .

Competition Software is pleased to announce Car Math for the Apple II computer. The program is designed to make modifying cars easier. Car Math can calculate engine displacement, top speed, gear ratios, carburetor sizes, tire diameters, convert cubic liters to cubic inches. Also included is a power speed calculator program (a \$25.00 value alone). Car math can help car buffs interested in drag racing pick the right components for their high performance machine the first time. Avoid spending hundreds of dollars on parts that won't work right. A manual is included to help guide you through the easy-to-use menu-driven program. Computer ownership is not necessary since many libraries, high schools, and colleges have Apple Computers available to patrons free of charge. Car Math for the Apple II computer sells for \$24.95 and is available from Competition Software, P.O. Box 1293, Park Ridge, IL 60028.

Engine Assembly Workbook

No engine builder should be without a copy of the ENGINE ASSEMBLY WORKBOOK from Mach Four Concepts. The ENGINE ASSEMBLY WORKBOOK, an attractive 12-page

booklet, makes recording an engine's critical measurements incredibly easy. And this allows the performance enthusiast to spend more time with his wrench, rather than a pencil.

Compatible with almost every 4, 6, or 8-cylinder powerplant, the Work-

book encompasses practically every facet of the engine building process. From a quick-glance torque specification section to the camshaft timing chart, the ENGINE ASSEMBLY WORKBOOK is a handy reference to evaluate changes in the future.

The new for 1986 Workbook includes spaces for recording measurements and determining clearances through simple subtraction. Also convenient are the formulas for calculating compression ratio and displacement. Both sections allow the engine builder to fill in his own specs. and verify the results immediately.

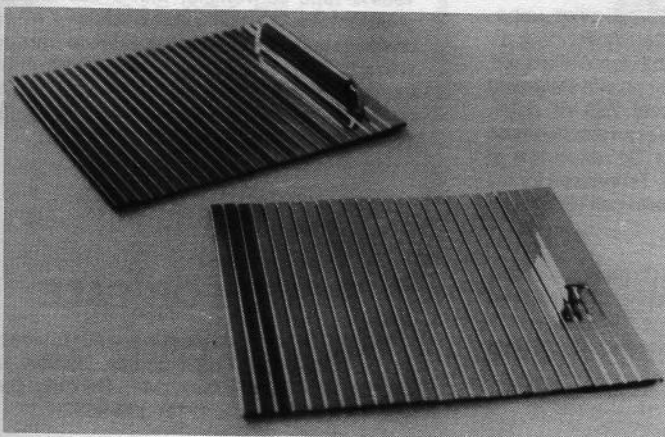

And for technicians new to the field, there's even a step-by-step blueprinting guide proven to facilitate higher horsepower levels and greater reliability. Single copy price for the ENGINE ASSEMBLY WORKBOOK is \$5.00 postpaid. Quantity discounts are available when ordering three or more copies.

Other recent developments from Mach Four Concepts include a drag racers test log and the Sourcebook to: Automotive Aftermarket Manufacturers. For more information write: Mach Four Concepts, Dept. MGT, P.O. Box 3786, Fullerton, CA 92634.

Larry's Rolls Back Exact Reproduction Console Doors

Fullerton, CA — If your 1967-1968

Mustang console has been doorless recently, Larry's has the answer to your problems. Finally, after having been obsolete for many years, these console roll-up doors are once again available through Larry's.

Like all products from Larry's, the console doors are made of the highest quality materials and are designed to replace OEM parts for fit and finish. These new doors are constructed of highly polished stainless steel and are built to last.

Larry's has rolled back the prices of these console doors to a low \$29.95, making it affordable for you to "spiff-up" your Mustang just the way you've always wanted to.
