

1991 MCA Calendar Makes Perfect Gift For Holiday Season

Looking for that perfect gift for the Mustang lover in your life?

The Mustang Club of America's official 1991 calendar is your answer!

This full-color collector's item is just the right holiday gift for your fellow Mustang Club members or anyone on your Christmas list who has an appreciation for America's favorite Pony car.

MCA's 1991 calendar features an outstanding selection of classic, later model and modified Mustangs and Shelybs from across the nation. The beautiful color photographs represent some of the best Pony cars in the country.

Price of the official 1991 MCA Calendar is \$8.50, which includes postage and handling. To order, send check or money order to: MCA Calendar, P.O. Box 447, Lithonia, GA 30058. Order today to assure delivery in time for the holiday season.

Regional groups interested in purchasing 1991 calendars in quantity should contact MCA National Headquarters (404) 482-4822.

WORLD CLASS BRAKING

Nearly Doubles Braking Power, Efficiency, and Control

USED BY: • High Performance Vehicles • New and Used Vehicles • Law Enforcement
• Medical Service • Limousines • Utilities - Fire • RVs - Fleets • People Who Care

BRAKE GUARD IS:

- It is a Safety System with "Anti-Lock" benefits for vehicles with hydraulic brakes.
- It operates automatically, every time the brakes are applied.
- It works to inhibit wheel lock-up, skidding and loss of control when braking.
- It stops vehicles straighter and shorter with better steering control.

HOW BRAKE-GUARD WORKS:

Heat and other dimensional factors cause brake drums and discs to become slightly egg-shaped or warped. So, when the brakes are applied, the contact surfaces are correspondingly uneven. This in turn causes an unequal transmission of braking effort from the wheels to the roadway resulting in premature wheel lock-up, early brake fade, uneven wear, skidding and loss of control of vehicle.

Like a computer, Brake-Guard's patented system automatically responds to the unequal braking surfaces at each wheel, constantly metering and compensating every time the brakes are applied. The result is an even, constant pressure and uniform coefficient of friction at each wheel through the cycle of rotation, resulting in a smoother, shorter and controlled stopping of the vehicle.
