

Host Hotels Selected For Atlanta National

The Georgia Regional Mustang Club has announced the selection of host hotels for its 1991 MCA National, to be held at John Bleakley Ford July 12-14.

Knights Inn and LaQuinta Inn will both serve as host accommodations for the show. Both are located on I-20 west of Atlanta.

"Those of you who intend to come to Atlanta and will need a room need to make your reservations now," according to Don Perry of the Georgia Regional Group.

"Both motels are located directly across the Interstate from Six Flags Over Georgia, and July is their busy season so you need to act quickly because rooms for the National show are guaranteed only until May 1."

Perry said Six Flags is expected to provide discount tickets for admission to the popular theme jpart to all car show participants.

For reservations at the Knights Inn, call (404) 944-0824. Rates are \$33.95 single and \$36.95 double. For reservations at LaQuinta Inn, call (404) 944-2110. Rates are \$50 per room. All reservations must be made by May 1.

The Rio Grande Mustang Club Will Hold A Regional Show May 25-26

Albuquerque Club Plans May Show

The Rio Grande Mustang Club of Albuquerque, NM will hold a regional show May 25-26 at the Ramada Classic. In addition to the usual assemblage of vintage Mustangs, special interest Fords are being invited for the first time, according to a club spokesman.

The festivities begin Saturday afternoon with registration and end Sunday evening with a banquet and trophy presentation.

For additional information on this regional show, write RGMC, 12825 Cedarbrook

Avenue, Albuquerque, NM 87111.

The Rio Grand Mustang Club has held two Grand Nationals, a National and two regional shows in the past five years.

One of the most active Mustang clubs in the nation, RGMC was host for the 1990 Western Grand National, attended by MCA President Charles Hampton and National Head Judge Bob Perkins. More than 100 classic Mustangs attended that event, which Hampton called one of the best shows I have ever seen.

WORRIED ABOUT HAVING YOUR MUSTANG STOLEN?
Secure any car with the NEW and IMPROVED SENOT HOOD LOCK AND IGNITION KILL!

Simply push in the hardened steel lock button and your hood is locked and ignition disengaged - preventing thieves from cutting alarm wires or hot-wiring your car. (SEE MUSTANG MONTHLY, Dec. 87, Page 72)

WORLD CLASS BRAKING

Nearly Doubles Braking Power, Efficiency, and Control

USED BY: • High Performance Vehicles • New and Used Vehicles • Law Enforcement
• Medical Service • Limousines • Utilities - Fire • RVs - Fleets • People Who Care

BRAKE GUARD IS:

- It is a Safety System with "Anti-Lock" benefits for vehicles with hydraulic brakes.
- It operates automatically, every time the brakes are applied.
- It works to inhibit wheel lock-up, skidding and loss of control when braking.
- It stops vehicles straighter and shorter with better steering control.

HOW BRAKE-GUARD WORKS:

Heat and other dimensional factors cause brake drums and discs to become slightly egg-shaped or warped. So, when the brakes are applied, the contact surfaces are correspondingly uneven. This in turn causes an unequal transmission of braking effort from the wheels to the roadway resulting in premature wheel lock-up, early brake fade, uneven wear, skidding and loss of control of vehicle.

Like a computer, Brake-Guard's patented system automatically responds to the unequal braking surfaces at each wheel, constantly metering and compensating every time the brakes are applied. The result is an even, constant pressure and uniform coefficient of friction at each wheel through the cycle of rotation, resulting in a smoother, shorter and controlled stopping of the vehicle.
