

## The 1995 Mustang Cobra Convertible...

The very best in open top motoring can be had with a Mustang Cobra convertible. The car's 5 liter pushrod engine develops 25 extra horsepower thanks to GT-40 heads, Ford/Crane roller rocker arms, a special intake and a host of other upgrades. This Cobra also employs the largest brakes ever installed on a Mustang. Wouldn't you like to store one of these in your garage for 10 or 20 years?
