

INTRODUCING SMART PLUGS™ FOR MUSTANGS.

SMART PLUGS WILL SIGNIFICANTLY IMPROVE YOUR BEST 0-60 TIME, IMPROVE GAS MILAGE, ASSURE COLD STARTS, REDUCE CARBONIZING, REDUCE HARMFUL EXHAUST EMISSIONS, NEVER NEED GAPPING AND ARE WARRANTED FOR AS LONG AS YOU OWN YOUR CAR.

Smart Plugs use a unique alloy of a rare earth element and stainless steel for its ground electrode. This material has a particularly low work function. (low work function is a measure of a materials ability to emit electrons.) The use of this electron-active material, called Ilenium™, has enabled us to produce spark plugs with a gap as great as

.3175mm. (1/8th of an inch). This exceptionally large gap creates a much larger spark kernel than other spark plugs, no matter what their design or

what their electrodes are made of, insuring more complete combustion.

Order a set of Smart Plugs @ \$10. each for your Mustang today. We

will send you a set of the OEM specified plugs for the engine in your car, modified with Ilenium ground electrodes. And a written warrantee. Order directly from the Mfg:
