

Snapshots

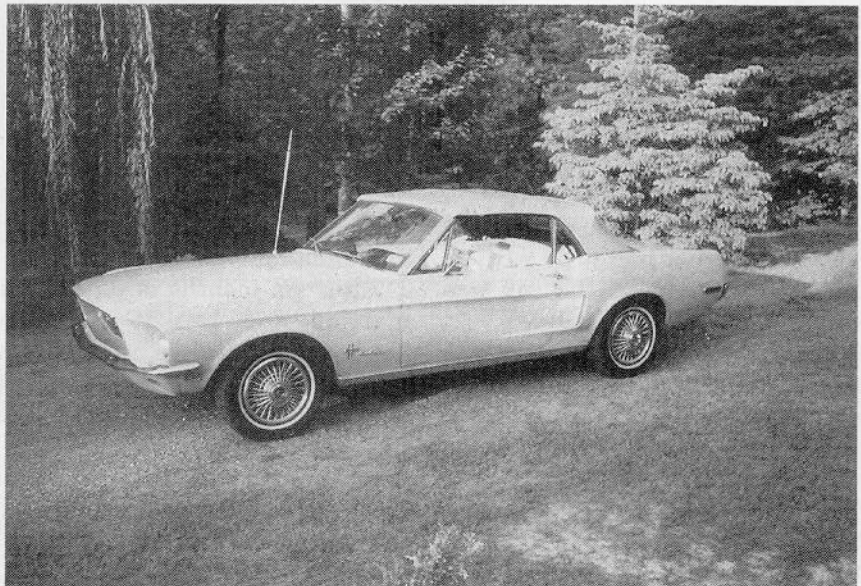

This **1986 Cobra GT** owned by **Bruce Carr** of **Ottawa, Ontario, Canada**, still sports the original **Medium Canyon Red** paint and has logged only 60,000 miles on the odometer. Although the 5.0 pony lacks power locks, power windows, cruise control, and air conditioning, Bruce says it is "just plain old fun".

(See the Mailbag section of the October 1997 issue for Bruce's original letter.)

This **Pebble Beige 1968 convertible** is owned by **Johnnie and Rachel Garner** of **Rock Hill, South Carolina**.

Equipment includes a **Parchment interior**, and **200 cid power plant** backed by a **C-4 automatic transmission**.

Used as a daily driver, the Garners indicate that this pony is the most important one in their stable and has won several awards during the past few years. The Garners are members of the **Carolina Regional Mustang Club**.

Jeff Kondra of **Hammond, Indiana**, who has worked as an engineer for Ford Motor Company for the past 15 years, is the proud owner of this **1983 GT**. As the original owner, Jeff has logged **only 46,000 miles** on the well kept beauty as he plans to pass it along to his son John in a few years.
