

Proof once again that Mustang enthusiasts can be found all over the world, **Sune Werodin of Sweden** sent us this photo of his **1970 Mach 1**. Although no particulars were furnished with the photo, we noticed that the rear bumper is missing. Then we caught Sune's note on the back of the photo, "almost ready, just wait and see."

**Bob and Angela Miller of Austintown, Ohio**, have owned this **1967 coupe** for five years. They were well acquainted with the vehicle before the acquisition as it was originally owned by Angela's grandfather. Equipment includes a 289 V8, automatic, **no power steering**, power brakes, AM/FM radio, wire wheels covers, and a **bench seat**. The car has been painted only once and remains in original condition including the 1968 grill piece installed by the grandfather many years ago.

This Ivy Green Metallic **1966 GT 2+2** is proudly owned by **Ron Smith, Jr., of Carlisle, Pennsylvania**. Equipment includes the very desirable high performance "K" code 289 V8, automatic transmission, black standard interior with full length console, and Styled Steel wheels.
