

Snapshots

This **1967 Candyapple Red convertible** is owned by **Mr. and Mrs. Adrian Pegg** of **Willington, Derby, England**. Adrian tells us that the original owner imported the car to England in December 1966 and used it for a second vehicle racking up only 70,000 miles. The **289 V8-equipped droptop** went to its current home just last year. The sale also included the original owner's manual, registration document, and build sheet.

Richard Garner of **Rock Hill, South Carolina** is the very proud owner of this **1968 hardtop**. Equipment includes a **Candyapple Red exterior**, **289 V8** coupled with a **three-speed transmission**, and **black interior**. Dad, **Johnnie Garner**, restored the Mustang which is used as a daily driver. Richard enjoys his pony via activities with the **Carolina Regional Mustang Club**.

What better way to bring a father and daughter together than the restoration of an early Mustang. **Mike Spalding** and his daughter **Taylor** of **Louisville, Kentucky**, restored this **1966 Sprint convertible** as a father/daughter project. Equipped with the **200 cid six-cylinder engine** and upgraded **Pony interior**, the **Tahoe Turquoise** beauty is pictured here in front of the **North Oldham Middle School** whose mascot is a very familiar looking Mustang.
