

Snapshots

Member **Joel Aubin** of **Montreal, Canada**, is the proud owner of this **1997 Cobra convertible**. Joel points out to us that the **Rio Red** beauty is one of only 75 Canadian editions. He has customized the droptop with goodies such as Cobra R wheels, rear wing and speedster tonneau cover from Saleen Performance, roll bar, Eibach suspension, SVO side exiting Borla exhaust, plus items from Classic Design Concepts.

This **Candyapple Red 1969 GT convertible** is owned by **John & Phyllis Ellison** of **Edwardsville, Kansas**. The ragtop was originally purchased in April 1970 in California. The Ellisons are the third owners and are lucky enough to have the complete history on the car. As they point out, not too many 1969 GTs appear on the show circuit. Equipment for this award winning example includes a **351 4V power plant** along with **black deluxe interior**.

The **Rio Red Stage 2 Roush Mustang** shown here is owned by **Bobby & Michele Summerlin** of **Cary, North Carolina**. The couple originally purchased the convertible in July 1996 and began the Roush transformation several months later. Bobby indicates that some time during the winter months, the Mustang will reach the conversion level of Stage 3. This sleek beauty has participated in 19 shows and five displays and is commonly seen at local cruise-in activities.
