

Purchased in 1984, **Dean Gier** of **Wichita, Kansas**, became the proud owner of this **1966 hardtop** while in high school. Optional equipment includes the **Sprint 200 "B" package, black deluxe interior, air conditioning, power steering**, and the recent addition of a **Rally Pac and Rotunda junior size tissue dispenser**. Dean and the **Tahoe Turquoise** beauty are often seen caravanning with fellow South Central Kansas Mustang Club members to nearby shows and events.

Not one to shy away from a bit of hard work, **Robert Sutton** of **San Leandro, California**, purchased this **1965 2 + 2** in 1976 for the whopping price of \$150. The catch to the deal? There was no engine, no transmission, no radiator, and no grill. And the interior was falling apart. Luckily, though, there was no rust. Eight years worth of determination and elbow grease went into transforming the metal hulk into a **Poppy Red** show winner.

This **1970 Shelby GT 350** is owned by **Alan Lipschultz** of **Addison, Illinois**. Equipment on the **Black Jade fastback** includes **white interior, 351 Windsor power plant, four-speed transmission, air conditioning, and tilt wheel**. Alan and his Shelby attended 28 shows and cruises in 1997 bringing home numerous trophies for their efforts.
