The complete
line-up of Steeda Q's
are available through
your local Ford dealer!

ADJUSTABLE COMPETITION UPPER 3RD LINK, W/CHASSIS MOUNT

Set pinion angle and eliminate torque deflection. Eliminates ALL windup and wheel-hop. Zinc plated. 05-07 555-4106 \$279.95

3 POINT FRAME RAIL & TORQUE BOX BRACE

Made from 4130 Chrome Moly material this brace ties together the inner/outer frame rails and the rear lower control arm mount. Braces are yellow zinc plated and come with mounting hardware.

Hardware supplied but welded installation is recommended for maximum benefit from this brace. 05-07 555-5551 \$239.95

STEEDA/MAGNUSON SUPERCHARGER

Add 120+ horsepower while maintaining factory like driveability, until you put the gas pedal to the floor that is! Working with Magnuson, Steeda engineers created a special intercooled system as well as a specific tune for your Mustang. Torque and horsepower output is increased from as little as 1,200rpm all the way through 6,000rpm. 05-07 498-01-12-65-011-SL \$5,495.00

CHROME MOLY CONTROL ARMS

Steeda Lower control arms for the 2005-07 Mustang are made from 4130 Chrome Moly Steel for ultimate strength and light weight. Features special polyurethane bushings. Powdercoated blue for a long lasting finish. 555-4422 \$209.95

STEEDA TRI-AX SHIFTER

Includes an extremely short throw, precise action and stop-bolts to prevent damage to the tranny under hard usage. A substantial billet beam provides more positive location. Upgraded bushings. 05-07 \$279.95

GT COLD AIR KIT

Steeda Cold Air Kit provides the most horsepower and torque of any kit on the market. Lifetime filter can be cleaned and re-oiled. With kit installed and the required computer re-calibration, we found 30 ponies at the rear wheels, and 29 additional ft.-lb. of torque! 05-07

- GT Cold Air Kit 555-3127 \$299.95
- GT Cold Air Kit with High Flow Elbow (up to 38hp increase!) 555-3131 \$379.95
- High Flow Inlet Elbow - Up to 8hp and 8ft.lbs. of torque to the tires throughout the entire powerband!! 555-3130 05-07 \$109.95

INTAKE SPACER

Steeda's Billet Aluminum intake spacer is designed specifically for the S197 and up 3 valve Mustang. Made from Billet 6061 aluminum it is designed to give you more plenum volume for increase horsepower. 555-3106 05-07 \$94.95

UNDERDRIVE PULLEYS

Free up to 10 horsepower with this pulley set at the rear wheel. A simple way to improve performance - easy installation! Developed through the SEMA Technology transfer initiative to eliminate harmonic vibration. 05-07 NEW LOWER PRICE! \$219.95

STEEDA BILLET FUEL DOORS

These gorgeous billet aluminum fuel doors are the perfect exterior add on for your 05-07 Mustang. Available in brushed, polished and black anodized finishes. 555-0212 05-07 \$119.95

STEEDA HOOD STRUT KIT

Eliminates the factory hood prop system. The gas charged Struts and laser cut stainless steel brackets mount at factory bolt locations, requiring no drilling. (2 Struts) \$139.95

STEEDA GT500 PULLEY

555-3345 \$239.95

STEEDA NON-ADJUSTABLE SHOCKS & STRUTS

Steedas new Pro Action shocks & struts, the ultimate in handling and quality for street & road course competition!

- Exceptional ride quality
- Lifetime Warranty
- Better ride than competing brands
- Engineered & manufactured to exceed OE standards
- Great for street and track action!

555-8405 05-07 \$399.95

STEEDA 13" REAR BRAKE KIT

The new, Made in America Steeda brake kit, is the lightest of its kind on the market resulting in less unsprung weight and rotating mass. The wider, larger diameter vented rotors provide better cooling and are slotted to disperse heat and gas buildup reducing brake fade. 05-07 555-6009 \$499.95

LOWER TRAILING ARM RELOCATION BRACKET

Steeda's Lower Trailing Arm Relocation Brackets are designed to let you adjust the location of the rear mounting point of the lower trailing arm allowing you to fine tune the instant center geometry of your Mustang. Improving the instant center geometry will increase traction for better 60ft times and better acceleration out of a corner on the road course. This kit is a weld-in only application. 555-8119 05-07 \$129.95

STEEDA X5 BALL JOINT

Steeda's X5 balljoint is designed to raise the roll center of your lowered 2005 or newer Mustang. What does this do? It provides better overall balance of your Mustang's suspension. This will help with reduced dive under hard braking and less body roll under hard cornering. By installing the Steeda X5 ball joint you will greatly improve the car's handling. 555-8108 \$149.95

SPRINGS

Enhance handling and appearance at the same time! Lower the car approximately 1" and improve handling without sacrificing ride quality. 05-07 from \$239.95

STEEDA SUPER LITE SPORT SPRINGS

Steeda Super-Lite Sport Springs are made with the latest manufacturing technology to reduce weight and improve handling. They have the same spring rates as our best-selling Sport Spring & weigh 15% less! 555-8205 79-04 \$249.95

STEEDA TRI-AX SHIFTER

83-01/2 (T-5, T-45 Trans) \$169.95
01/2 and up (TR-3650 Trans) \$169.95
Tri-Ax for Tremec 3650 /TKO \$189.95
Tri-Ax for T-56 \$189.95
Tri-Ax for Tremec 500/600 \$189.95
Sport Shifter (T-5 + 3650) \$99.95

STEEDA CASTER CAMBER PLATES

Increase caster for better high-speed stability and better steering response. Movable bushings to raise or lower the upper strut mount for more suspension travel. Adjustable strut mount can be set to stock height, which works better for drag racing than other plates which are too high and limit suspension extension at launch. 94-04 \$249.95

3-PIECE IDLER PULLEY KIT

Made from billet 6061 aluminum these idler pulleys will really dress up the front of your engine. The 3 piece set is hardcoat anodized for corrosion protection and longevity. Bearing is OEM spec and features a double sealed design, something the competitors don't offer. 555-3342 96-04 \$189.95

FIREWALL CABLE ADJUSTER

Looking for an easy way to adjust your clutch? This adjuster's click lock mechanism allows for the adjuster to lock in place automatically insuring the adjustment does not change unless you want it to! 555-7021 79-04 \$39.95

WEIGHT JACKER LOWER CONTROL ARM

MORE TRACTION • BETTER HANDLING • ADJUST RIDE HEIGHT • SET CORNER WEIGHTS
U.S. Patent No. 649821 From \$299.95

OIL SEPARATOR KIT

Reduces detonation, oil burning and deposits on the valves \$69.95

YOKICO DRAG STRUTS

..... \$189.95 each

STEEL LOWER CONTROL ARM

79-04 \$199.95

STEEDA CUSTOM CLUTCH KITS

for all Mustangs from \$209.95

COBRA COLD AIR KIT

Features a 5" high-flow reusable dual cone filter with more surface area than single cone models to flow the most air. A stainless steel shield deflects engine heat from cold air coming in. This intake produces 10-15 RWHP on a stock Cobra. All necessary hardware is included for a hassle free bolt-on installation 555-3127 03-04 \$199.95
555-3123 96-01 \$199.95
