

## DEEP ALUMINUM PAN

Performance Auto released their new deep aluminum pan for five-speed automatic 2005-current Mustangs.

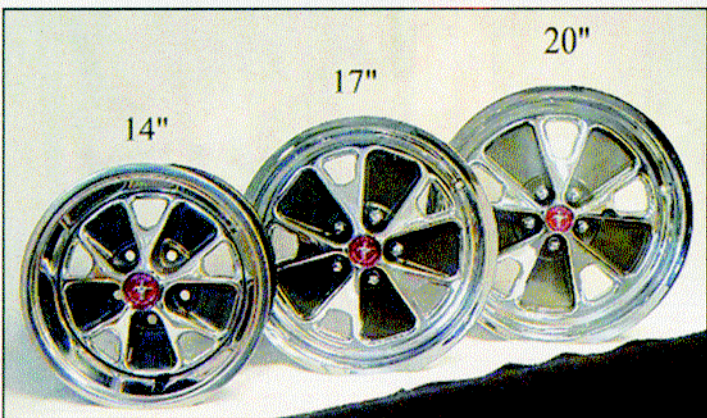

The pan, which increases fluid capacity by four quarts on the 5R55, is cast from high-strength aluminum alloy and machined for a drain plug. The pan also allows the use of Performance Auto's new matching tranny filler tube and dipstick, which eliminates the need for a special tool and messy and incorrect factory fill procedure.

Order part number PA27455KT for the pan and filler tube kit or PA27455 for the pan only. Order from Performance Automatic online at [www.PerformanceAutomatic.com](http://www.PerformanceAutomatic.com) and be sure to mention that you read about it in *Mustang Times*.

## STYLED STEEL WHEELS

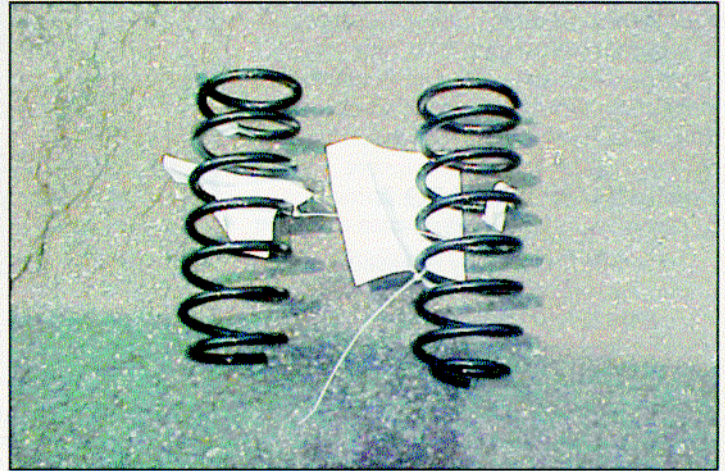

California Pony Cars newly released SS Wheels designed after the classic "Styled Steel" wheel used on 1960's vintage Ford Mustangs. These NXT Generation Wheels are available in 17 X 8-inches to fit '64 1/2 to '73 Mustangs and in 20 X 9-inches and 20

X 10-inches to fit 2005-2007 models. The SS Wheels are designed to be direct bolt-on replacements for various models of 1964 1/2 to 2007 Ford Mustangs and other cars with 5 on 4.5" bolt patterns.

Also available are California Pony Cars' 17 x 8-inch 10-Spoke Wheels in natural or black finish. Look for a 14-inch 10-Spoke wheel coming soon.

Call 1-888-225-7669 or 1-909-923-2804 for more information and be sure to let them know you read about the wheels in *Mustang Times*.

## 1993 COBRA REAR SPRINGS

## BACK-UP ASSISTANCE

Is driving in reverse a problem for you? Is parking your Mustang a problem for you?

If you answered yes to either question, you need to check out Rostra's new safety devices for any year Mustang without chrome bumpers: RearSight®, a passive rear camera, and ParkPilot® ultrasonic smart parking systems. These systems can be used simultaneously or independently.

RearSight® utilizes a high-quality, waterproof color camera which can be installed in the spoiler or license plate, using either of the two shrouds included in the kit, and a 2.5-inch LCD color display

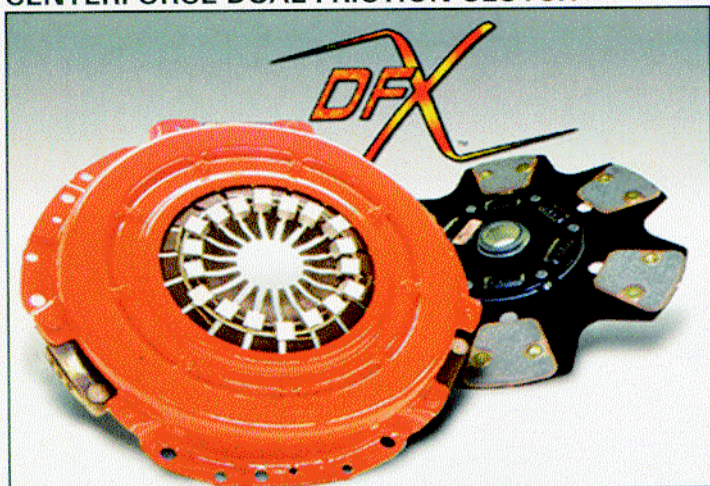

which is built into their rearview mirror. This camera will provide the driver with a 150-degree, wide-angle view from the rear of the Mustang, by way of the rear-view mirror, when the vehicle is in reverse.

The ParkPilot® system uses two sensors attached to the Mustang's bumper. Available in black, white, red, silver, green, or blue, these sensors provide a 120-degree conical area of detection. Automatically engaging when the vehicle is placed in reverse, an internal alarm will sound if a static object is detected within five feet of any of the three zones. The system has an internal alerting system with an adjustable volume control and an "on/off" switch as well as an additional "mute" switch to temporarily silence the alarm.

Designed to be discreet, Rostra says these systems will not interfere with the Mustang's design.

Both systems feature a three-year, 36,000-mile warranty. To find a dealer/installer, visit [www.rostra.com](http://www.rostra.com) or contact Rostra's customer service at 800-782-3379.

## CENTERFORCE DUAL FRICTION CLUTCH

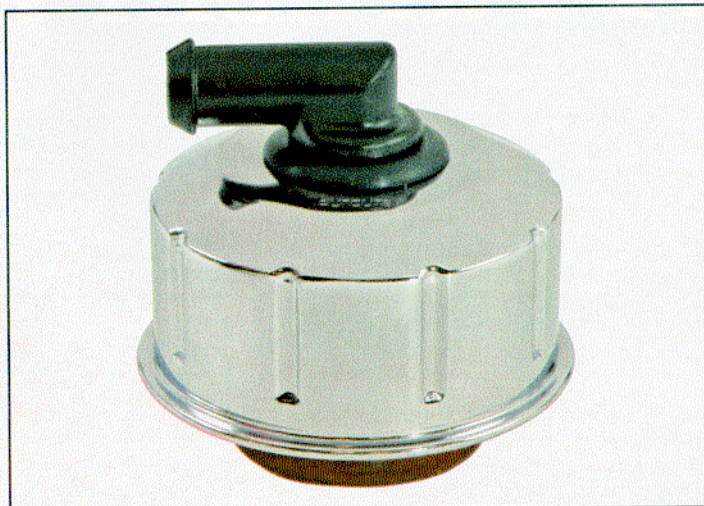

Centerforce introduced this New Dual Friction clutch assembly for 2005 to 2006 Mustang 4.0L V6's. This new clutch assembly replaces the stock pressure plate with an assembly with a higher holding capacity that is designed as a direct bolt in for perfect fit and function.

This new application is now available as a Dual Friction® clutch assembly for use in high torque street driving and light racing applications. The Dual Friction part number is DF490309 (Pressure Plate & Disc included).

Also available is the Centerforce II for mild horsepower increases; the part number is CFT363309 (Pressure Plate) & 280490(disc) sold separately. Please contact any Centerforce dealer or Centerforce directly with questions at 928-771-8422. Be sure to mention that you saw them in *Mustang Times*. You may also visit them online at [www.centerforce.com](http://www.centerforce.com)

## AUTOLITE LOGO OIL CAPS

New "Twist-On" Autolite Logo oil caps are available from Virginia Classic Mustang. These caps are exact reproductions of the originals. Features include three filters, the Autolite logo, and a choice of black chrome or black painted finish. A plastic PCV elbow is included but not installed for those who wish to re-use their original metal elbow. Also included is a rubber grommet for the top of the cap.

The chrome cap sells for \$34.95 and is Part number EG-118. The black cap is \$29.95 and is part number EG-1181.
