

BEAUTIFUL LADY/HANDSOME MUSTANG

Millicent Moye is a physician in Indiana. When she completed her residency, she went looking for a new car for herself. She knew she wanted a Mustang, at first it was going to be a V6.

Millicent was always surrounded by the car hobby, even as a kid. Her dad liked to work on cars and later on operated a service station in addition to his full-time job. Growing up in Indianapolis, Millicent recalls, "There were always car events going on and my brothers and I would often go together. Because of being around cars, especially performance cars, I always wanted a sports car. But, unfortunately there are not many American-made cars left fitting the bill (super performance coupe)."

One of her brothers suggested the Mustang GT, so she took one out for a test drive. She was hooked. Next she made sure she got the color she wanted—black—and then had the Silver stripes painted on him. ("Him" is how Millicent refers to her Mustang. She named him, Gilles! Don't you just love it?) Her Gilles has upgraded wheels and the dash is equipped with the My Color feature. The interior is Black leather with lightly tinted windows to protect it from the harsh sun! Of course, Millicent couldn't stop there. So, next she added a set of Flowmasters to bring out the sound as her five-speed manual transmission goes through all of his gears.

Millicent would like to do other mods, but not too much. Her plans are to equip Gilles with headers, a beefier suspension, and a Ford Racing Supercharger. She plans to keep Gilles for quite a while, and doesn't want anything to prevent his long life! Currently, Gilles will be garaged for most of the winter. No snow, salt, or sand for this guy!

We'll look for Millicent this summer at shows. She's been enjoying membership in her local club, currently serving on the Board of Directors, and recently joined the MCA.
