

STEROIDS™ FOR '65-'70 MUSTANGS

Want to convert your Mustang from manual steering to modern power rack and pinion? Speed Direct announces a complete Steeroids™ POWER rack and pinion steering conversion kit for '65-'70 Mustangs! The kit comes complete with a new pump, new custom pump mounting bracket, pulley, hoses, rack and pinion, and all the hardware you need to complete the conversion. A true bolt-on kit when purchased with steering column, Steeroids™ does not require any permanent modification to the vehicle. Enhanced steering feel, lighter weight, and the elimination of leaks are all advantages to this system. No more fighting the loose stock steering, especially "on-center."

Steeroids™ rack and pinion kits include an exciting quick ratio rack yielding approximately 2.5 turns lock-to-lock at the wheel, not to mention the adjustable tie rod ends that eliminate bump steer!

Kits are available with or without steering columns. If you use your stock steering column, one cut to the column is required. This kit includes all the components and hardware necessary to completely replace the stock steering system.

SpeedDirect is a retailer of performance parts and upgrades for muscle cars and classics.

PONY-STYLE UPHOLSTERY FOR FOX BODY MUSTANGS

Classic 1965-'66 Mustang Pony Seat Upholstery is available for 1987-'93 Mustang Fox Body Mustangs from TMI Products' Classic Division. "The Fox Body Mustang is exploding in popularity in today's restoration market, just as the '64 1/2 Mustang was for an earlier generation," said Dean Satterfield, Classic Division sales and marketing manager. "Ford built more than a million cars in this body style, and almost 40 percent are still on the road, so the market is ripe for customization."

The seats come in a high-back GT-Style with knee bolsters, as well as standard-style seats. TMI Classic Division is the first aftermarket supplier to offer a wide array of cloth, vinyl and leather interiors for the Fox body, giving enthusiasts and customizers a choice.

Go Retro with original 1965-'66 Mustang colors and grains to make a complete personalized statement, or go for a straight restoration with original Fox-body type vinyl or

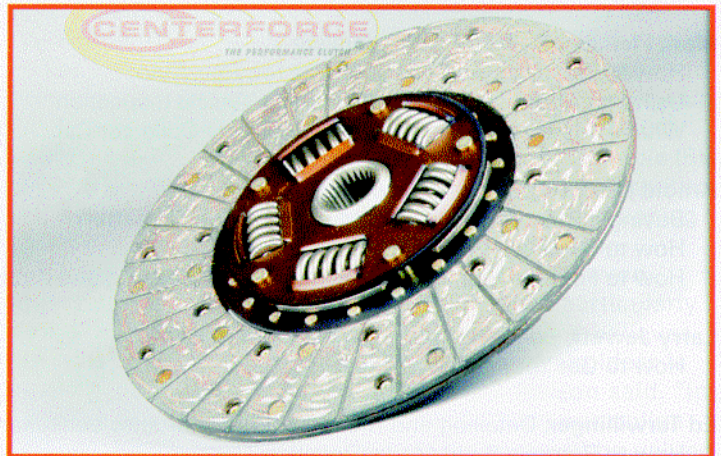

custom leathers and cloth materials

TMI also offers matching Seat Foam for improved comfort, appearance and performance.

CENTERFORCE '99-'04 REPLACEMENT CLUTCH DISC

Centerforce introduces a new performance replacement clutch disc for 1999 to 2004 Mustangs 11-diameter clutch with an after-

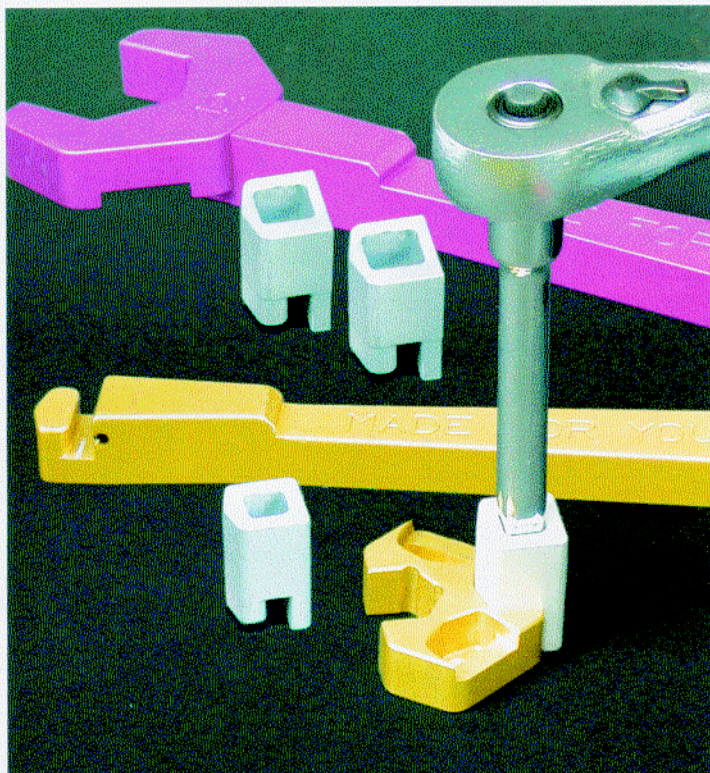

market 26-spline transmission input shaft. This replaces the stock disc with a more reliable assembly with a higher holding capacity designed for use with only a Centerforce clutch pressure plate.

This new Centerforce disc for mild horsepower and torque

increases is available as Part # 388144 at your favorite Centerforce Dealer. For more information on this or other Centerforce parts, or for a Dealer locator, call Centerforce at 928.771.8422, or visit them on the web at www.centerforce.com. As always, tell them you saw them in *Mustang Times*.

QUIK-CLICK® AN WRENCH ADAPTERS

Made4You Products presents this unique wrench for the serious engine builder, professional racer, and hobbyist who knows the importance of protecting the finish of and not over-

tightening AN fittings. Unlike other AN wrenches, these are detachable from the handles and can be positioned in three locations to provide a straight or angled wrench!

Easily detached, the wrenches incorporate a ball and detent, similar to socket wrenches. Made in the U.S.A. from T6061 aluminum, they will not scratch the surface of your AN fittings.

Each kit contains one small and one large handle and one each, #3,4,6,8,10,12, & 16 wrench ends.

Allows attachment of a standard 1/4-inch or 3/8-inch ratchet or ratchet extension to the Quick-Click AN fitting wrench head to offset the handle when space is limited or when it is necessary to clear an obstacle. Packaged as a set of two 1/4" and two 3/8-inch adapters. For dealer information, log onto Made4You's website, or contact:

PUT A FORD IN A FORD—ADD STYLE AND EXUBERANCE!

Triple-D Induction, a Barry Grant company, has just produced a SixShooter to suit Ford 302 cid engines. Comprising three 250-cfm two-barrel carbs (choke on center unit), new aluminum

intake manifold, and a polished Rush Performance air cleaner, the Six-Shooter matches and outperforms today's best single four-barrel combinations. Designed for Ford-powered hotrods and with carbs turned rearwards (like the originals) to clear the distributor, this triple two-barrel induction system is beautifully crafted, nostalgic in appearance, and easy to install and tune.

The SixShooter features just three adjustment screws—no synchronization needed. This kit is also supplied with fuel inlets and throttle linkages, including special right-side crossover mechanism.
