

**'06 TO '07 5.4L  
SUPERCHARGED GT500 SHELBY**

Centerforce® is proud to introduce this New Single Disc Replacement 11" DFX® clutch assembly for the '06 - '07 Ford 5.4L Supercharged GT500. This new clutch assembly replaces the stock Twin Disc pressure plate with a more reliable assembly and a higher holding capacity that is designed for use with a Centerforce flywheel for perfect fit and function. The DFX line is the latest series of performance clutches from Centerforce. This new DFX series is engineered for competition standards. The DFX series is aimed at high-end applications that continually demand increased integrity and holding-capacity. DFX provides some of the best drivability from a race-inspired clutch. DFX retains an easy pedal effort, thanks to Centerforce's patented ball bearing actuated diaphragm, for smooth engagements without detriment to the vehicle's release components.

The Centerforce DFX performance clutch system is SFI approved for competition with Nodular Iron pressure plate rings and reinforcements designed to help prevent drive strap breakage and safety. The DFX Kit part number is 01570841 (Pressure Plate, Disc, Dowel Pins & Hydraulic Spacer Included). Each component included in the kit may be purchased separately; the Pressure Plate PN: 11570841 (Pressure Plate, Dowel Pins & Hydraulic Spacer Included) and Disc PN: 23388144. Please note the Aluminum Flywheel PN: 900215 or Steel Flywheel PN: 700215 are required.

**ADD LIFE-LIKE MANIKINS  
TO YOUR DISPLAY!**

Tired of seeing the "little boy hiding his face" at car shows? Want to add something more life-like and interesting to your garage display? These custom Manikin characters are made of

wood and the hands and faces are made of polyurethane. They are available in either a sitting or standing position. Each one is custom, handmade and hand painted. While "A Guy Named Elvis" is the most popular of the Manikins, they can be custom tailored to fit your display and imagination including Mechanics, 50s Characters, Cowboys, Indians, Gangsters, Hobos, Jailbirds and Clowns. "Talkies", too - The mouth moves through a wireless microphone.

Each Manikin weighs approximately 35 pounds.

Retail prices range from \$500 - \$750, depending on detail and specific requirements, "Talkies" start at \$1,500.

**STEEDSKINS ANNOUNCES  
LEATHER SHIFT BOOT  
FOR '05-'06 MUSTANG**

An all-new product has been released from SteedSkins, allowing Mustang owners to upgrade their interiors with the rich look, feel, and smell of genuine leather. Currently available for 2005-'06 Mustangs, the SteedSkins shift boot is made from top-quality automotive-grade leather for a great match to the Mustang's factory color and grain.

Not a "universal fit" product, the SteedSkins shift boot features a unique bonded ring collar top just like the factory boot, allowing it to fit snugly with the OEM style shift knob for a factory fit and look.

SteedSkins premium products are handcrafted in America. Other similar products on the market are made in China and in Romania.

Installation is easy. The new SteedSkins boot comes packaged with complete instructions and requires few if any tools to install. It uses the factory plastic boot base attachment ring which requires you to disassemble the original boot. The SteedSkins boot is precisely cut with the same attachment slots as the factory boot, which slide over the tabs on the factory boot base ring.

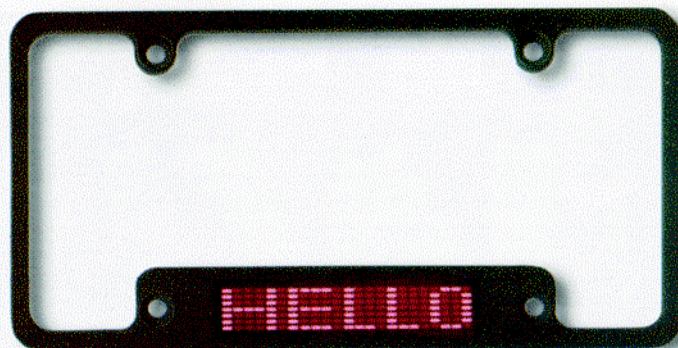

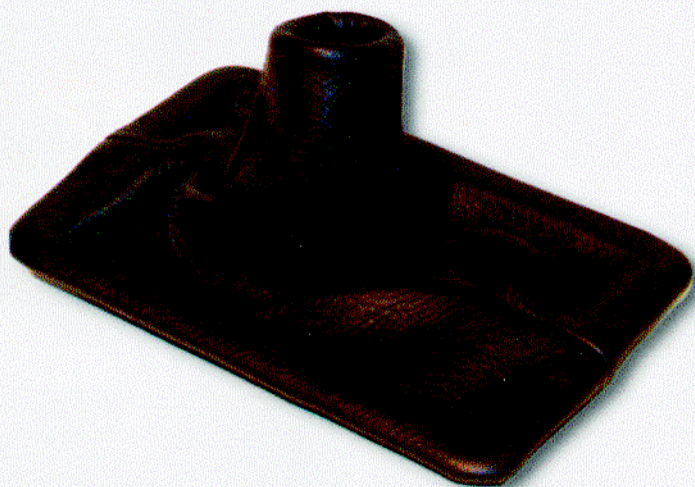

Some gluing with high-bond rubber cement is required, available inexpensively at virtually any hardware store. Once the boot is securely attached to the factory base ring, the whole thing snaps easily into place. The top of the neck slides tightly over the base of the factory shift knob just as the factory unit does and then your are done. We consider installation to be a "2.5 hammer" job on a 1-5 scale.

SteedSkins boots are initially available to fit 2005-'06 Mustangs in factory-match Dark Charcoal leather with matching Dark Charcoal stitching. Additional products will be added soon for the 2007-and-up models as well as Fox and SN-95 Mustangs built prior to 2005. SteedSkins will be adding other color options shortly, including Red, Grey and Chamois leather to match color-keyed interiors.

The new SteedSkins brand of products is available now through [www.SteedShop.com](http://www.SteedShop.com). Suggested retail price \$49.99. Dealer inquiries are invited.

**SCROLLING DIGITAL LICENSE PLATE FRAME**

Roadmaster USA Corp. has produced the Roadmaster Scrolling Digital License Plate Frame (Model RLPF100) which let you personalize your car with your own messages or ads that scroll on your license plate.

Priced at \$59, the scrolling system comes with 99 pre-set words and phrases, including "Help me," "Slow down," "Turning left," "Your lights aren't working," "Baby on Board," and they also let you program five interchangeable messages of up to 120 characters each. Messages can be combined or repeated and the speed and brightness of the LED can be adjusted with the included wireless remote. The scrolling system is easy to install and include 12 Volt hardwiring.

The Roadmaster Scrolling Digital License Plate Frame is great for announcing the sale of your car with the price and phone number; showing your website URL or store name; or for giving warnings and sending notes to other drivers and friends. The system can also be used for news and fun phrases, such as sports games results, holiday greetings, or your personal philosophy or motto.

All states allow non-scrolling messages to be displayed in moving cars, but some states may restrict the use of scrolling messages while the car is on the road and may only allow their use when the car is parked or stationary. Roadmaster recommends that customers check their state and local regulations to see if scrolling LED products can be used while their car is in motion.

**When you're ready to make your next move...**

**Trust me to make it a smooth one...anywhere in the country or the world!**

For all your relocation needs, contact **Jim Silverman**, Jack Conway, Realtor, & President of the Mustang Car Club of N.E.

Let me customize your next move with a full range of relocation services, including: Cost-of-living comparisons • School & community information • Discounted moving services • Mortgage assistance • Referral to reliable Mustang transporters • Access to thousands of Realtors worldwide

As the former National Head Judge of Mustang Club of America, I have a keen eye for detail. I will use the same discriminating guidelines in assisting you with your next move.
