Your Road Starts Here!

The excitement is back. Your dream to go back has become a reality. Join the many that have found it possible to recreate a time and place that make their hearts beat faster and their nerves jingle with excitement. Go back to the power and torque of yesterday, but, go there today because...

The steel used in our body shell program is 1006 universal automotive grade steel. In most cases the gauge will be thicker than of the original. The steel possesses fewer additives allowing it to be a bit more flexible and workable than the original.

What is the quality of steel used and are the gauges the same as original?

No. Whereas they are as close as you can get not being assembled or built on an assembly line, there will still be some fitting and working to make everything line up. Just the same, as if you were working with a 40 year old body shell.

Are these body shells ready to be finished?

Yes, the MS67FB and the MS68FB are licensed through the Ford Restoration Licensing program.

Are these body shells licensed?

FAQ's

Ford Oval and Mustang are registered trademarks owned and licensed by Ford Motor Company. Manufactured by Dynacorn Classic Bodies Inc.

MSRP: \$15,500.00
