

The *Mustang* and *COUGAR*
Tagbook
(1965-1973 models)

The key that unlocks all those mysterious tags on your car

**1965-1973
MUSTANG AND
COUGAR
TAG BOOK**

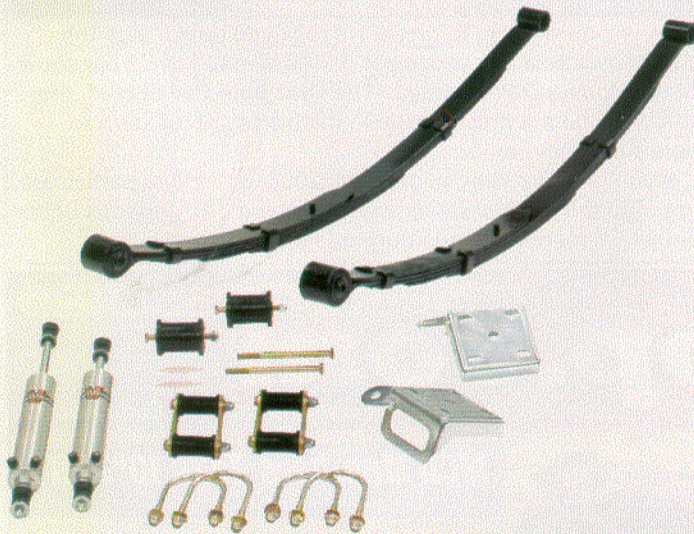

Virginia Classic Mustang, Inc. announces the availability of the *1965-1973 Mustang and Cougar Tag Book* by Kevin Marti. Featuring details never before published about various tags used on '65-'73 Mustangs and Cougars, Kevin Marti has been researching this subject for more than 20 years.

This is a complete guide to decoding the engine, transmission, carburetor, steering box, power steering pump, axle, radiator, buck, VIN, ownercard and door data tags on your car. Detailed pictures showing actual tags and noting running production changes and assembly plant differences. Accurate charts that show third digit on some trim codes, how to decipher the date codes on various tags, and so much more. Valuable for restoration or authentication, it is possible with this one book to establish whether major items on a Mustang or Cougar are "numbers matching."

Available for \$26.95 plus shipping, order Part No LT-611. Be sure to mention you read about it in *Mustang Times*.

REAR SUSPENSION SYSTEM

Multi-link coilover rear suspension systems are nice, but they can come at a price that just doesn't fit your project. If you're looking for upgraded performance and adjustability on a budget or if your motorsport sanctioning body does not allow coilovers, check out Total Control's leaf spring suspension from Reenmachine. The kit includes everything you need to transform your sagging old rear suspension into an adjustable high-performance system without sacrificing ride quality.

ROUSH VENT GAUGE POD

True performance drivers want to know exactly what is going on with their vehicle at all times, but much of this detailed information is typically only available through supplemental gauges. Adding an accessory gauge may increase clutter and decrease visibility around the dashboard, and typically requires some cutting or drilling.

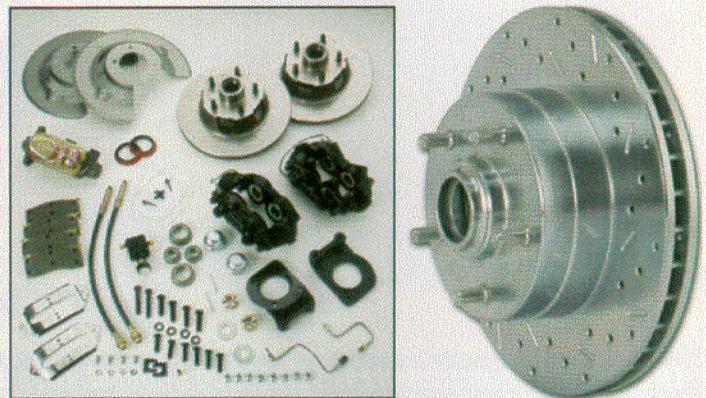

The new ROUSH® Vent Gauge Pod is designed to integrate in the heating, ventilation, and a/c (HVAC) vent of any '05-'08 Mustang (including the Shelby GT500) or '04-'08 Ford F-150. Installation is simple with no cutting, drilling, or trimming required. Installation time is just minutes.

The ROUSH Vent Gauge Pod will not obstruct the air, there is no significant loss of air flow for the cooling and heating functions of either the Mustang or F-150.

The Pod Gauge, P/N 403840, has a suggested retail price of \$29.99 and will fit any standard 2 1/16-inch gauge (not included).

"This is such a simple idea and gives a clean and professional looking installation, and I am really proud to say that the ROUSH Vent Pod Gauge was dreamed up and created by one of our engineers during his free time," said Jack Roush. "I think this is a perfect example of how our employees are thinking about innovative ways to continue improving the driving experience virtually 24 hours a day."

For more information see your local ROUSH dealer, visit www.ROUSHperformance.com; or telephone toll-free 1-800-59-ROUSH.

REENMACHINE & STAINLESS STEEL BRAKES

Reenmachine is now carrying and installing the full line of braking systems and components from Stainless Steel Brakes at its Ventura, CA shop. From stock-appearing systems that fit inside your stock 14" wheels to full-race systems for your wild project, SSBC has a kit for everyone. These kits are incredibly complete and include every last item needed to completely modernize your Mustang's braking system. This critical safety upgrade has never been easier! Most kits are available with the new BIG BITE cross-drilled rotors for the ultimate in looks and performance.

PERFORMANCE PROGRAMMER

JET Performance Products released their new Performance Programmer for 1996-2004 Mustangs with 3.8 & 4.6L engines. The programmer features three different tuning presets to optimize performance for regular, midgrade or premium fuels for gains of up to 23 horsepower. The programmer also allows modification to shift points, shift firmness, top speed and rev limiters. Also corrects the speedometer and shift points after making gear ratio or tire size changes on 99-up models.

The programmer also includes a built in scan tool that reads and clears diagnostic codes and features live data monitoring. Detailed instructions and the user friendly programming procedure offer trouble free installation with no tools required.
