

I've waited 32 years for My Mustang. Back in 1974, I was 19 years old looking to by my first car. A cousin of mine worked for an auto mechanic who had two cars for sale. One was a 1970 Buick GS and the other was a 1971 Mustang Fastback. His asking price for that Mustang was a bit more then I had to spend. I really wanted that Mustang and was trying to get him to come down in price. Someone else came along a out bid me. That haunted me for years. So after many years of being married to a great woman and getting three beautiful kids thru college, it was time for dad. When Ford redesigned the Mustang in 2005 with that retro Fastback look, I knew I just had to have one. Finally in October of 2005 I got my Mustang! She's a 2006, V6 with the Pony Package. To date I have added a S&B air intake, a Flow Master exhaust, the Running pony Graphics ,Chrome gas cap and Roush hood scoop. I have always loved the "My Mustang" article in Mustang Times and, although my wife feels this is my mid-life crises, she suggested I take a shot and send a photo of "My Mustang."
