Safe for use on chrome, billet aluminum, powder coating, and painted surfaces. The set includes 4 handles: 6- and 12-inch straight, 6-inch 45- and 90-degree straight; 7- plastic heads: 1-inch and 4 1/4-inches long flat, 1/2- and 1-inch chisel head, 3/4-inch paddle head, ball head, cone/pick head; 2 Ferrule connectors; 2 butt-ends; and a handy storage pouch. Motorbooks International

Shelby Book

Colin Comer, Cobra aficionado, released "The Complete book of Shelby Automobiles: Cobras, Mustangs, and Super Snakes."

The Complete Book of Shelby Automobiles: Cobras, Mustangs, and Super Snakes details all of Shelby's automotive creations, from the first Cobras and Mustang GT350s of the 1960s through the one-off race cars to the very latest Mustangs Shelby produces today.

The author of the best-selling book *Million-Dollar Muscle Cars*, Colin's taste in collector cars is eclectic, but his true passion is for the cars of Shelby American. When not maintaining or writing about cars, Colin can be found piloting his meticulously prepared 1966 GT350 race car on racetracks, or somewhere on the road exercising a Cobra. When asked about his practice of driving the wheels off of his cars, Colin says, "What good are they just sitting around collecting dust? They are instruments meant to be played. While they look great just sitting there, their true beauty comes out when you get to see, hear, and feel what they are capable of."

Priced at \$45, the book is available at motorbooks.com, amazon.com and anywhere fine books are sold.
