UPR BILLET CATCH CAN KIT

UPR Products introduces its Billet Catch Can Kit for 1979-'09 Mustangs. Machined from solid billet aluminum, the can filters out and prevents oil from contaminating the intake air charge, a major cause of detonation. The can is especially useful on power adder combinations where excessive crankcase pressure is a problem. The unique two-piece design enables easy filter cleaning and oil disposal. The UPR Billet Catch Can kit comes with all necessary hardware and fittings for easy installation. It is available in either a brushed satin or highly polished finish. EAGLE ONE NEW CAR CARE PRODUCTS

Eagle One has introduced two new products that take wheel care and car washing to a new level. These products continue Eagle One's reputation for developing innovative appearance care products that provide great results, easily.

Keep Clean Wheel, developed with Eagle One's proprietary technology, provides a protective barrier against corrosive brake dust and road grime to keep wheels clean and shiny for up to two weeks.

For the ultimate wheel care, use Eagle One's A2Z All-Wheel & Tire Cleaner to clean your wheels and tires. Follow up by spraying Keep Clean on your rims for the ultimate protection from brake dust.

A second technological advancement is **Easi-Dri Car Wash**. Developed with sheeting action technology, Easi-Dri saves time and effort sheeting the water off the finish of your car without hand drying, leaving it clean and spot free.

Suggested retail for Keep Clean Wheel is \$6.99; for Easi-Dri it is \$5.99. Both are available at leading auto parts retailers.
