

HOW TO REBUILD 4.6/5.4-LITER FORD ENGINES

Ford's 4.6- and 5.4-liter engines have powered several million V8 Ford since it was introduced in 1996, including Mustangs. CarTech Auto Books has published How to Rebuild the 4.6-/5.4-Liter Ford.

This 8.5 x 11-inch, quality softcover was written by George Reid who has also authored *Ford Engine Parts InterChange* and *Ford V-8s on a Budget*, both published by CarTech.

Part of CarTech's Workbench Series, this book features detailed photos and comprehensive captions that will give you step-by-step direction through the entire rebuild process including disassembly, selecting parts, to engine assembly and break-in and tuning. Included is a High-performance parts guide, reference charts, and a source guide.

Retailing for \$24.95, item #SA155 is available by phone or on-line. Be sure to tell them you read the review in *Mustang Times*.

ARVINODE EXHAUST SYSTEMS

Mustangs Unlimited has Arvinode Exhaust systems available for any 1964-1966 Mustang 289 V8 equipped with dual exhaust and a 2-inch diameter H pipe.

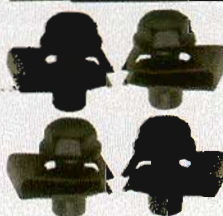

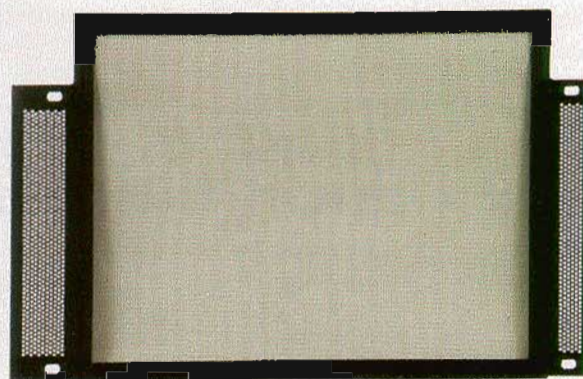

These exhaust systems give customers the opportunity to bring back the original sound, appearance, and performance of this rare and unusual exhaust system.

Available in either a Base or Concours model (for Judged vehicles).

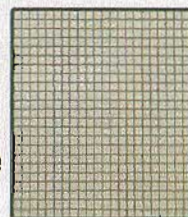

Exhaust systems include: Intermediate pipes that connect the H pipe outlets to the front mufflers; Mufflers (Concours model includes Rectangular "dampener" tubes which are unique to this product.); Over-axle pipes; Resonators with turndowns; Saddle clamps (Concours model includes two original Ford-style regular steel clamps. Base systems include regular steel exhaust clamps). Stainless Steel clamps are available for an additional cost. All mufflers and pipes feature aluminized steel construction.

FRONT SEAT BACK TRIM PANELS

Virginia Classic Mustang, Inc. announces the availability of 1969-'70 Mustang Front Seat Back Plastic Trim Panels.

These panels are exactly like the originals. They feature the correct grain and detail along with properly installed metal retainers to install just like the originals. Correct clips for installation are also included.

They are available in the correctly matched off white or black color. These colors are molded in and not dyed or painted. If a different color other than black or white is required though, these panels are paintable.

Order part number ST-8061 for Off White and ST-806 for Black. Price is \$46.95 each plus shipping. Be sure to mention *Mustang Times*.

SHAKER HOOD FOR THE 2010

Classic Design Concepts and Ford Racing have released their new Shaker Hood System for the 2010 Mustang GT. Dealers and owners of this iconic American pony car can now personalize their new 2010 Mustang GT with this high-performance Shaker Hood System that is engineered and built to OEM specifications.

The Shaker Hood System is a fully functional unit that forces outside cold air into the factory or aftermarket air box. The system attaches directly to the engine and sports a well-designed engine cover with Ford Racing badges. Topping the system is a cast aluminum scoop, which is identical to the

original Shaker included on the famous 1969-1970 models. The Shaker Hood System kit includes all mounting hardware, ductwork, template and detailed instructions. Installation can be completed in three-hours or less with basic tools.

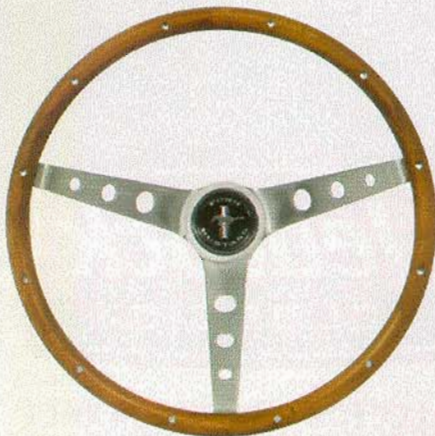

The 2010 Mustang GT Shaker Hood Systems can be purchased from Ford Racing distributors or from Classic Design Concepts under the following part numbers:

- *Ford Racing* *M-16612-SHK*
- *Classic Design Concepts* *1095-7000-01*
