## STACK WHITE GAUGES

STACK introduced a new addition to their 52mm gauge line—a new white dial face variation! This line of minor instruments is designed to complement white dial face STACK tachometers and Integrated Dash Displays for customization to suit your information needs and visual preferences. Available in three movement types, professional stepper motor analogue, electric analogue, and mechanical analogue to suit your performance needs and budget. All instruments feature no glare black bezels, high contrast white dials with easy to read black markings and bright orange needles. Vivid white LED backlighting and illuminated needles reduce current draw, provide excellent vibration resistance and exceptional night-time visibility. Initial product release includes most commonly monitored parameters with scales available in both Imperial and Metric.

Be sure to tell them you read about their gauges in *Mustang Times*.
