

OFFERINGS FROM PERFORMANCE PARTS, INC.

MASS AIR METER

A new offering from Performance Parts is this Ford Racing 90mm Mass Air Meter, which is perfect for your 42 LB/hr fuel injector conversions! Brand new in FRPP packaging!

Retail is over \$199.99. While we have them, we're offering them for \$89.99 each!

BULLITT FRONT CALIPERS

This will be your last chance to get a set of brand new 2001 BULLITT front brake calipers! The best part is that they are only \$199.99 per pair—while supplies last!

These are nationally advertised elsewhere for \$400.00-plus. Call ASAP as quantities are severely limited!

We have matching rear red calipers at similar savings!

MUSCLE Z-BAR

Barillaro Speed Emporium specializes in metal shaping and machining of hot rod parts.

Their latest introduction is Muscle-Z-Bar which features:

- All stock Ford mounting locations and pivot points
 - Direct bolt-in with no cutting, drilling, or welding
 - Spherical rod ends on fully adjustable linkage rods, w/hardware
 - Fully TIG welded z-bar
 - Spherical bearings and CNC machined picot tube
- Kits are available for 1965 -1970 Mustangs (and Cougars), for both small and big blocks, and for 1967-1972 F-100 and FE engines. Retail is \$169.95 each kit.

Barillaro Speed Emporium recently relocated to Knoxville, TN. When you contact them, be sure to tell them you read this in *Mustang Times*.

STEEDA TRI-AX® SHIFTER

Endurance tested to perform perfectly for over one million shifts, Steeda Autosports' Tri-Ax® short-throw shifter is one cog-swapper that will never let you down and is right on the cutting edge of shifting technology. It is designed, engineered, and made in the USA, and has been granted a U.S. Utility Patent.

The Steeda Tri-Ax® shifter is your guarantee of short throws, precise action, and extreme engineering. The shifter is designed to prevent damage to your transmission under daily driving or adverse hard usage on the street, track, or strip. With many exclusive features, like two-position handle height and calibrated internal spring tensions, you have all the mechanical help available to ensure that you never miss a gear. Their Tri-Ax® features:

- 100% Full Lifetime Warranty
- Pivot ball and lever constructed from 1-piece billet steel
- A design that affords greater stiffness front-to-back
- Factory mounting rail replaced with a substantial billet aluminum bar for more positive positioning
- Upgraded rear mounting bushings
- Offset-preload coil springs
- Multi-position adjustable heights
- Fewer moving parts to wear or break down
- Extreme heavy duty construction
- Grade 8 and stainless steel hardware
- Nickel plated pivot shaft that won't rust or stain
- No complicated, unnecessary adjustments
- Compact tower design that is easier to install
- Exclusive BootGuard
- Comfortable hand position
- Smooth, confident, precise shifting technology

Installation time is estimated at about two hours, however Steeda recommends that a qualified tech handle the job. They rate the installation a 3 of 5 in level of difficulty.

Priced at \$269.95, Part No. 555-73111 fits a 2010 GT; Part No. 555-7305 fits an '05-'09 GT.
