

## 11-INCH CLUTCH ASSEMBLY

Centerforce® is proud to introduce their 11-inch Centerforce® II clutch assembly that has an increased holding capacity over the standard 11-inch long style clutch assembly for 1965 - 1971 vehicles equipped with 390, 427, 428, and 429 engines. This new clutch assembly replaces the stock plate with this 11-inch, more reliable diaphragm clutch assembly that is designed as a direct bolt in for perfect fit and function.

This new application is now available as a Centerforce® II clutch assembly for use in high torque street driving applications.

- Part #MST559000 includes Pressure Plate, & Disc.
- Part #DF559000 is the Dual Friction (Pressure Plate, & Disc included). Both are available from any Centerforce® dealer.

## AIRAID® FILTER COMPANY

When the new 5.0 hit the market, many aftermarket companies went straight to the drawing board. One of those is AIRAID® Filter Company who has designed a bold new intake system to compliment this four-valve Twin Independent Variable Camshaft engine.

AIRAID®'s MXP Series intake system utilizes Modular Venturi Technology to generate an additional 11hp and 11lb-ft of torque without the need for aftermarket tuning. The removable Modular Venturi Tube (MVT) allows for additional performance gains with customer-provided custom tuning. This gives Mustang enthusiasts the option to complement any aftermarket modifications such as headers, camshafts and other bolt-on performance enhancing products.

The kit comes complete with a Hand-Made High-Flow Premium Filter, Roto-Molded Cold Air Box and Intake Tube with 100% stainless clamps. That translates into improved air flow over stock and dramatically improved throttle response and power. Each kit comes complete with hardware, easy to read instructions and our "No-Hassle" Warranty.

AIRAID® Filter Company is located in Phoenix, AZ, and supplies high-quality performance products to leading distributors throughout the country.

## PERFORMANCE AUTOMATIC C4 POWER PLANET

Performance Automatic, Inc. has found that the forward planetary gearset is the weak link in high powered Ford applications running the C4 transmission.

Performance Automatic has redesigned his gearset to incorporate 6-pinion gears compared to a stock style 3 pinion, thus increasing load handling characteristics by 100%. Precision CNC machining guarantees precise gear alignment and consistent performance. The planet carrier is also machined to accept a roller bearing assembly or use the original equipment washer. Performance Automatic offers a "Guaranteed Forever" warranty on this C4 Power Planet, which is **part number: PA26418P**.

**OFFERINGS FROM KICKER®**

**DX-SERIES AMPLIFIERS**

KICKER® DX-Series Amplifiers simply provide reliable, relentless power, and make it affordable for those who seek top features in a high-performance car audio or multimedia system.

A pair of DX.1 Mono-Channel Subwoofer Amplifiers supply all the necessary features expected from high-power, monoblock amplifiers that pulverize subwoofers with energy-saving, Class D power, including the ability to be stable under loads as low as one Ohm. DX Sub Amps are rated at 1,000 watts or 500 watts (1 Ohm at 14.4V).

An additional, often overlooked benefit is that each individual KICKER® Amplifier's actual power always exceeds its rated power, as documented inside the carton. While KICKER® amps are always covered by a two-year factory warranty, KICKER® will provide an additional one-year extended warranty with the purchase of a qualifying KICKER® installation kit at the time of the amplifier purchase.

**KICKER® COMP™ SUBWOOFER BOXES**

Vicious KICKER® Comp™-Loaded Sub Boxes dole out truckloads of affordable bass. Whether it's menacing dual-sub enclosures that refuse to quit, a thin-profile box for your truck cab, or the vented VC12 housing a brutal 12-inch Comp Subwoofer, the onslaught of bottom end rumbling from your trunk or haul space makes the value of Comp-Loaded Sub Boxes that much harder to believe.

DC12 and DC10 Dual-Sub Boxes give outrageously expensive bass a bad name by offering a couple of updated round Comp woofers in a stout, gray-carpeted KICKER® box with a monogrammed carbon-fiber front. A TC10 Sub Box Comp puts swagger where there are space limitations with a thin-profile enclosure for max mounting options. All Comp Sub Boxes are vented for the most intense loudness.

The four Comp Sub Boxes feature a custom-designed, combination vent/terminal cup, where the impedance designator (2 or 4 Ohm in dual-sub boxes; 4 Ohm only in single-sub boxes) and oversized port share space.

- Dual Box 12-inch Comp DC12 MSRP - \$349.95
- Dual Box 10-inch Comp DC10 MSRP - \$329.95
- Single Box 12-inch Comp VC12 MSRP - \$229.95
- Slim-Profile Box 10-inch Comp TC10 MSRP - \$179.95

**ZX-SERIES AMPLIFIERS**

New-for-2010 are KICKER® ZX-Series Amplifiers, which provide the utmost reliability from the biggest name in trouble-free amplification and loud, clear sound. Two-

channel, four-channel, a five-channel hybrid with subwoofer section, and absurd single-channel subwoofer amps round out a hard-working, noise-free lineup with heat sinks that can be personalized with edgy vinyl skins. An often overlooked benefit is that each individual KICKER® Amplifier's actual power always exceeds its rated power, as documented inside the carton.

Seven ZX.1 Mono-Channel Subwoofer Amplifiers give the user a bevy of energy-saving, Class D\* power choices for supplying bass needs. From 300 watts up to a ridiculous 2,500-plus watts (all listed ratings 2 Ohm at 14.4V), KICKER® makes selections available for what it does best... bass. ZX-Series Multi-Channel Amplifiers put the choice of system installation in the listener's hands. Two ZX.2 Stereo Amplifiers offer the same bundle of features that designate them unbeatable, including the +18 decibels of bass boost.

While KICKER® amps are always covered by a two-year factory warranty, KICKER® will provide an additional one-year extended warranty with the purchase of a qualifying KICKER® installation kit at the time of the amplifier purchase.

**Consumers should contact any Authorized KICKER® Dealer or log onto [www.kicker.com](http://www.kicker.com) for more information.**

**STEVE MCQUEEN TRIBUTE**

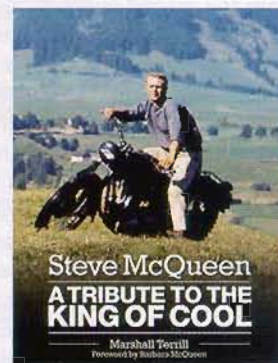

*Steve McQueen: A Tribute to the King of Cool* (Dalton Watson Fine Books), tells his story through the eyes of those who knew him best: family, friends, co-stars, business associates, acquaintances and adoring fans from around the globe. Written in passage form, each person brings a different view to the man and legend, presenting him in an unsurpassed 360-degree perspective.

"It reads like a biography but it's really a photo and tribute book," said author Marshall Terrill. Terrill spent three years compiling the information. "I know it will please McQueen fans."

Accompanying the 200 passages are hundreds of photos of McQueen's life and movie career, as well as his passion for automobiles, motorcycles and antique airplanes, many seen here for the first time.

The 384-page book includes a foreword by widow Barbara McQueen, a family tree, personal documents and memorabilia, and passages from several Hollywood luminaries.

*Steve McQueen: A Tribute to the King of Cool* has been published in two versions. The Special Edition (\$95) comes in a slipcase and is limited to 2000 numbered copies signed both by Marshall Terrill and Barbara McQueen. It also includes a CD of a recording a 1978 lecture given by McQueen on *An Enemy of the People* at Loyola Marymount University. The Regular Edition (\$49) is also available with a dust jacket.
