

HIGH PERFORMANCE FAN SPACER

A new offering from Virginia Classic Mustang is a 1965-1966 Fan Spacer for 289 Hi-Po equipped Mustangs. The spacer features correct markings including FoMoCo script on the alignment pilot dowel. It's also an official Ford Licensed Product.

The cast aluminum design is like the original. The sizing is the correct overall size of 2.36 inches. The body itself, not including the alignment pilot dowel, is the correct 21/16th inch length. This is the correct spacer for all 1965-1966 K Code Mustangs, including GT-350s. Original versions have become increasingly difficult to find, and when found are usually quite expensive.

Order part number EG6445, priced at \$49.95 plus shipping.

UPR LOWER CONTROL ARMS

UPR offers replacement parts for stock stamped steel rear lower control arms on 2005-2010 Mustangs. UPR Products' Billet Street lower control arms are direct replacements utilizing the reduced weight of billet aluminum. Also included are Energy Suspension Poly-Urethane bushings to help eliminate wheelhop, reduce unsprung weight while adding traction. This direct bolt-on is available in the following finishes: Machined, Mirror Polished, and Black, Red, or Blue Anodized. Installation should take roughly 60 minutes with normal hand tools.

Contact information is below, be sure you tell them you read this in *Mustang Times*.

ROCKET RACING WHEELS

Rocket Performance Machine introduces new cutting-edge wheel styles available for spring 2010.

The Rocket Launcher Series maintains 10-spoke spindle mount appearance of the '50s and '60s drag cars, but with a safer five-lug bolt-on application. Available in two different finishes including Gray Painted Centers with Machined Outers, Fully Polished and Full Satin "As Cast", the Series styling, bolt-on performance, and pricing are sure to impress even the most seasoned vintage drag and hot rod enthusiasts.

The Rocket Velocity Series has a one-piece alloy wheel, built to deliver maximum style and performance at an affordable price. Velocity Series wheels feature a traditional outer lip and split spoke.

Rocket Velocity is available in chrome and painted finishes requiring little maintenance. When the wheels get dirty, simply hose them off and towel dry.
