

This mold still pumps out perfect grilles

What you see is what you get and what you're seeing is an Original Ford plastic injection mold mounted inside a 750 ton injection machine. This same mold made grilles for the assembly line 40 years ago. What you'll get is the most accurate, historically correct, reproduction 1969 Ford Mustang grille on the planet.

That's the advantage of using restoration parts made from Original Ford Tooling. No poor quality issues, no questions about inferior fit or finish, just superior parts made in the U.S.A. It's that plain and simple.

For quality assured Mustang parts look for the Original Ford Tooling and Daniel Carpenter labels

Daniel Carpenter Mustang Reproductions* has been manufacturing molded plastic, rubber, weather stripping, die cast, and stamped metal parts since 1983. Our products are confidently used by professional auto restorers and Mustang enthusiasts alike.

As a wholesale company, Daniel Carpenter Mustang Reproductions makes Original Ford Tooling parts available to the public through a network of classic Mustang parts suppliers world wide. For a listing of these dealers please visit www.dc.mustang.com
