Ford Shop Tips on CD

Easy to use PDF format on CD. The Ford "Shop Tips" magazine was a Ford technical service publication provided to servicemen in service stations and independent garages to help mechanics with the servicing of Ford vehicles. This technical information kept mechanics abreast of new developments and factory-recommended procedures. Shortcuts, tips, or tricks...whatever they are called, these articles provide invaluable information to mechanics to make repairs fast and easy. Articles are written in plain, straight-to-the-point fashion and provide simple solutions to common problems. Most of this information cannot be found anywhere else because it was developed after the publication of the shop and parts manuals.
