

SUMMER READING FROM CARTECH®

How to Restore Your Mustang 1964 1/2-1973 is a hands-on guide for restoring a 1st Generation Mustang. The tome shows how to turn a Mustang in need of restoration into a jewel. Prior books focused on authenticity, this book details how to actually restore each major component—chassis/suspension, brakes, steering, body, interior, and engine/drivetrain/differential.

Author and automotive journalist, Frank Bohanan,

provides insight into the challenges, expenses, drawbacks, and benefits encountered during a restoration. This information helps you decide whether you can handle the restoration on your own or should have it done professionally.

The 160-page, fully illustrated in color, quality paperback is available now and retails for \$29.96 plus \$6.95 S&H.

289 HI-PO MAIN CAPS

Cobra Automotive offers an exact reproduction 289 Hi-Po Main Cap set. The set is cast and machined here in the USA from original Ford blueprints.

Each set consists of caps numbered 1-4 and requires the use of an original rear main cap to finish an engine. These caps are cast from high-quality Nodular iron and machined for ease of fitting to any 289 block.

The I.D. of the main bearing bore is .020 under size and the side registers are .010 oversize on each side for proper adjustment before line boring and fitting to a block for the first time. They have the proper style number cast on them with the arrow facing forward just like the originals.

No need to search on the web or at swap meets for questionable original main caps or "look alike" caps made overseas. Rebuild your existing Hi-Po or upgrade any regular 289 block with these new pieces to handle the added horsepower of today's modern cam profiles and/or stroker rotating assembly.

Complete catalogs are available for \$5 (includes postage and handling).

LED DASH LIGHT KIT

NPD offers a long-awaited solution to dim stock lights. They offer two types of light kits to replace stock incandescent bulbs. The standard kit includes all single diode LED bulbs, which are twice as bright as the stock bulbs. The 5X kit includes LED bulbs with 5 diodes that are three to four times as bright as stock. The kits also include single diode LED bulbs for the turn signals, high beam, alternator, and oil lights.

Standard dash kits start at \$24.95 and 5X dash kits start at \$45.95.

Separate kits are also available for the Rally-Pac, dash clock, and console clock, starting at \$4.50.

STAGGERED SHOCK MOUNTING PLATE

Identical to the original mounting plates, NPD sells plates made from the correct material, thickness, and plating. Welding is required to install. These plates are adaptable to all 1967-1970 Mustangs. They were originally found on 1968-1970 Mustang Boss 302, 428, Boss 429, and Shelby GT500s. \$383.05 per set.

- Part #18A129-1A 1967-'70 Mustangs with staggered shocks or to convert to staggered shocks.

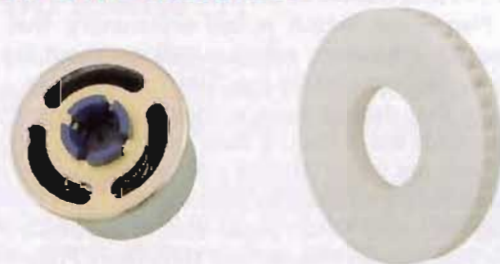

FOLDDOWN SEAT LEVELING SHIMS

These are the correctly cut shims originally used to level the fold-down seat at the mounting bolts to the floor. They are sold in sets of four for \$14.94 per set.

- Part #613B08-1A
