SHAKER HOOD SYSTEM FOR 2011-UP

Classic Design Concepts has released a new 5.0L Shaker System for 2011-up Mustangs. Give your 5.0L an intimidating, classic look with CDC's Shaker featuring a pronounced, heritage cast aluminum hood scoop. The 5.0L Shaker is manufactured

in the U.S. and designed and engineered to precise O.E.M. specifications for excellent fit and finish.

The Shaker contains OEM level underhood materials, utilizes factory

attachment points, and retains the factory strut tower brace. Installation requires no paint work.

CDC's Shaker installs using the stock aluminum hood, which has a factory-stamped recess in the hood's inner layer. This element was included by Ford specifically for the CDC Shaker to maintain the structural integrity of the hood after a hole is cut. Included are all necessary mounting hardware, air management system, hood template, and detailed guide for a seamless, professional installation.

- **Part # 1111-7000-01 is priced at \$795.**

AIRRID THROTTLE BODY SPACER

Looking for better throttle response and increased low-end torque? AIRRID's PowerAid® Throttle Body Spacer is the answer. The high quality CNC-machined anodized billet aluminum and patented Helix-Bore design creates a spinning of the incoming air charge as it passes through the throttle body spacer. This air charge contributes to improved intake velocity and better atomization of the air/fuel mixture at the combustion chamber. The result is dramatically improved torque, stronger midrange power, and overall combustion efficiency for better fuel economy. Easy to install, the PowerAid® kit comes with all mounting hardware and instructions and features AIRRID's exclusive "No Hassle Warranty."

MRT REAR WINDOW LOUVERS

MRT introduces rear window louvers for '05-'12 Mustangs, which complete the lines of the Mustang without compromising visibility. Each slat produces a tight flowing arc that complements the rear window and has a smooth, seamless surface—no distracting rivets or hardware.

Offered in powder-coated satin black and ready to install, the louvers feature a light weight and durable one-piece all-aluminum design hinged for easy lift for cleaning. A standard MRT prop rod makes cleaning a one person job.

Made in America, MRT louvers do not require metal drilling or mods during installation. The hardware kit includes instructions and materials needed. **Retail is \$436.99.**
