

BOOK REPORT

The Super Fords

DeTomasos • Boss Series and Ford GT's

by Wallace A. Wyss

NEW BOOK BY SHELBY'S WILDLIFE AUTHOR

Wallace Wyss, author of Shelby's Wildlife: the Cobras and the Mustangs, has authored a new book entitled The Super Fords; DeTomasos, Boss Series and the Ford GT's.

The new book is divided into thirds. The first third covers the DeTomaso saga--the Mangusta, the Pantera and what went wrong with the Pantera that caused Ford to withdraw it from sale in the U.S. (it is still being sold in the rest of the world!). The second third devotes a chapter each to the Boss 302, the Boss 351 and the Boss 429. The last third of the book covers the Ford GT, especially the Mk. I small block (289) and the Mk. II big block (427) and the Mk. IV (also 427) and the Mirage (289, 302 and 355).

Wyss spent over a year writing the book, and dug deep into the dusty archives of Ford Motor Company to find the more than 100 pictures featured in the 102-page book.

In contrast to Shelby's Wildlife, the new book is soft-bound, and horizontal in format, like a photo album. It has several full-page pictures.

The book is sold by Zuma Marketing, Box 9359, Marina del Rey, California 90291. The price is \$15.95 for 49-state residents plus \$1 postage and handling. Californians must pay \$16.91 per book plus \$1 postage, to cover State Sales Tax.
