LETTERS TO THE EDITOR

cont'd. from Pg. 4

one Shelby owner has participated. Any Mustang owner with interesting information or story is also invited to write.

By far, the most interesting V.I.D. plate information I have received thus far is from Gary Schweitzer of Grosse Pointe, Michigan, and the Mustang Owners Club of Southeastern Michigan. Gary has, as most of us know, an extremely rare find! A very early 1964½ (1964½ really, Mustang convertible. This Mustang, there is no question as to its being authentic. The V.I.D. plate shows: 5F08T383386 Date 15B DSO 842011, Color M automatic transmission and another rare item, an AM tape unit. Twelve Mustangs were specially built for display at the New York World's Fair in 1964, Gary's was one of them. His 1964½ was built 15 February 1964, just two weeks before the official start of production in March of 1964. If you notice, the V.I.D. number is 383386, which is high for an early production model, so there is no possible way it could have been a regular production model 1964½ Mustang. It was not built along with production Mustangs. When production started at Dearborn in March of 1964, the serial numbers started at 5F000100001.

Mustang production began at San Jose, California and Metuchen, New Jersey weeks later. Gary's 1964½ has a 200 cu. in. six which was not available on production Mustangs until Fall of 1964. The AM tape unit was not available until 1965 on production models. Any member out there who may think they have a prototype Mustang is encouraged to write. As of now, Gary has the oldest known Mustang. Quite a car, Gary. Thank you for writing.

Other interesting finds for '68 owners was a letter from Dan Elliott of Dahlonaga, Georgia. His V.I.D. number is 8F0LJ100002. Probably the oldest Mustang to be found anywhere. Will 100001 please step forward? Dan has the second Dearborn production unit built in the 1968 model year. Thus far, I think we've found the oldest 1964½ and 1968 models. Dan's Mustang was bought new in Jacksonville, Florida with a DSO 24.

We have found three Mustangs built the same day! Bill Simmons, 1968 Shelby GT 500 8F03S143544 with a build date of 05A (5 January 1968). Richard Peterson also of Georgia with a 1968 hardtop, 8F01C144186 with a build date of 05A as well. Both cars were built at the Metuchen, N.J. assembly plant the same day. We also have a Dearborn "F" code built 1968 Mustang hardtop here in Altus, Oklahoma with a V.I.D. 8F0LJ137064 built 05A. This Mustang is owned by Bob Ali-Carr. As you can see, the possibilities are endless for match ups. Just wait until the project is finished!

The final article on this project will have a complete listing of all, or mostly all, who participated and the I.D. numbers and Mustangs/Shelbys. It will start with the oldest 1964½ and run up to the newest 1973 model.

The Mustang Club of America, at last count, had over 5,000 members. There are still many of you out there to hear from. Let's make this project very successful. For those of you who wish an answer, I'll make every effort to answer either through a personal letter or through The Mustang Times.

The final article will cover a lot more! So far we've seen 3 Mustangs built on the same day, the earliest known Mustang, and even the earliest known 1966 Mustang owned by Laura Foster of Cincinnati, Ohio #6F07C100409 built 25 August 1965.

Again, I hope to hear from you. This project should interest many.

Jim Smart
