

## FEBRUARY CAR OF THE MONTH

1971 BOSS 351

Owned by: Gary Schwartz  
Merrill, Wisconsin

We purchased our Mustang, a 1971 Boss 351, last year in Columbus, Ohio. We are the third owner. The car was in very good condition when we bought it, although some things had been changed along the line.

All the pollution plumbing, rev control and heater hose had been removed. The car had traction bars and the exhaust system and rear end had been converted to that of a Mach I. We have brought the car back to near original condition and will do more this winter.

The car has a tilt steering wheel, AM stereo tape deck, factory "mags", spoilers front and rear, and the option I like..the Mach I sport interior. It has 18,000 original miles on the odometer and still has the original tires that came with the car.

The Dearborn, Michigan show this year was our first. It was there that we heard about and decided to go to the Atlanta Grand National. We really enjoyed seeing so many fantastic Mustangs in one spot.

On the 800 miles to Dearborn, the Boss averaged 17.8 mpg with a 3.90 to 1 rear end.

Editor's Note: We would like to thank Gary for the opportunity to feature this beauty as our January Car of the Month. (Side note: Gary also failed to brag a little..his Boss 351 was First Place winner at the Atlanta Grand National of the Boss Class.)
