

The Shelby GT Maggs Are Back!

Out of production for almost as long as the Shelby GTs themselves, the unique styling of the original Carroll Shelby 14-inch and 15-inch alloy wheels is available again.

Both 10-spoke designs feature 7-inch wide rims. The 14-inch wheel is an exact duplicate of the original supplied on '65 and '66 GT-350s; the 15-inch is the same as those on original '67 and '68 GT-350 and GT-500 cars. Both wheels are made from the original molds, updated to current Tire & Rim Association specifications.

Whether you want to keep your Shelby GT all original or want to add the GT touch to your Mustang, you'll be glad these lightweight, high-style alloy wheels are available again. From Carroll Shelby Industries, naturally.
