

1966 Coupe

I purchased my 1966 Mustang coupe in February of 1978 in good condition. However, like most Mustangs, it needed a little bit of work in assorted areas. I have done most of this over the past few years and now the car is in excellent condition. I am the third owner of this car.

It carries the 200 cid six-cylinder engine with the Sprint package. It also has an automatic transmission with console. I have installed a Rally-Pac and door lights and have done a

valve job and added a new Holly "Economy" carburetor since buying the car. I have installed split headers and a dual exhaust system, too. Set up this way, the car delivers approximately 20 miles per gallon in city driving.

My Mustang has won three trophies in local shows, despite its original interior.
