

PONY PLATES

We have another new column for the *Mustang Times*. This one will be called "Pony Plates" and is a blatant copy of a feature which editor John Pilon has in his magazine *Chevrolet Nues*. It was one suggested by several readers as well.

All of the photos appearing here were taken at the Eastern National in Columbia. We are, however, urging that any interested member submit a photo of his Mustang's personalized plate along with any special tale that might be

behind it. We like the coded ones that indicate the owner's message if you can break the code. Like STOPDK, obviously a dentist's plate. But this will not be a requirement. The only requirement (other than that of a decent photo) will be that the plate has to be attached to a Mustang.

Like all the features in the magazine, "Pony Plates" will continue if it is supported. We can't do it without your help! So please take the time to send your picture.
