

What Price, Mustang? Take A Guess At This One.

1964¹/₂ Hi. Perf. Mustang

When the Mustang was introduced in April 1964, I had prior information that a Hi Perf. Mustang would be introduced later. So I placed my order. In August 1964, I took delivery. The Mustang had Prairie Bronze paint with Palomino interior. It now has 109,650 miles on it.

When it turned 100,000 miles, the engine was pulled and completely rebuilt. The only parts of the engine reused were the block, crank and rods. It now has 351 W heads, ported and polished with 390 valve springs, titanium keepers. The rods were Mag fluxed and shot peened and connected to 12 to 1 TRW pop-up pistons.

The cam is a Le Mans GT 40 type as listed in the Muscle parts book from

Ford. All the reciprocating parts were balanced and stuffed back into the block and torqued to specification. It also has the Cobra dress-up stuff, along with 2 Carter AFB-4b1's on a Cobra intake.

All the running works have been replaced, including the ring and pinion gears, wheel bearings and wheel cylinders, brake drums and shoes, etc. I guess about every moving part has been replaced with new ones.

The I.D. plate lists the Serial No. 5F07K167773, body 65A-trim 89, color P, date 16F, axle-trans 8-5. The wheels are 72 Mustang with E-60 14 Goodyear Rally front and F60-14 rear. About all I can say now is, it sure comes on!
