High-Performance Registry

It is known that approximately 4000 "K" engines (289 ci./271 hp) were built. Where did they all go? If a third each went to Mustangs, Comets and Fairlanes production, this makes each of these combinations very rare indeed. What happened to the 427 powered Mustangs?

Clark Welborn, Mustangs of Memphis, is compiling a registry for high-performance cars. If you have any information that would be beneficial to Clark, you can send it to him at 3612 King George Cove, Memphis, TN 38118.
