Solution to December puzzle, HORSIN' AROUND. The part of the puzzle that refers to the first production Mustang is the number of clues. If you count the clues you'll see there are 65 in all, but clue 43 Across is only HALF a clue! So there are 64% clues to the puzzle.

(Let me know if you thought HORSIN' AROUND was enjoyable. If enough members think so, I'll try to get more "fun" into the TIMES. — Editor)
