

HI-PERFORMANCE ENGINES

VINTAGE MUSTANGS

VINTAGE MUSTANGS specializes in the small block Ford engine. Two engines per week are built . . . only two. If yours is one of them, you can rest assured that only the best parts are being used, each part is fitted & matched perfectly to that engine, there is no "Production Line Assembly," and each engine is detailed!

VINTAGE MUSTANGS will build your old engine to your specifications or will sell you one of our engines out-right. We stock all of the necessary parts including your choice of camshafts, lifters and pistons.

VINTAGE MUSTANGS welcomes any calls concerning technical information, parts availability and price information. We stock new, used and N.O.S. engine and body parts. We can also handle any transmission work for straight shift or automatic.

If you want your Mustang or Shelby to run as good as it looks, you might as well pay to have it done right the First Time!
